

## Accelerating Business Transformation with AI-Powered DataOps & Migrations

### Data and AI Challenges Holding Businesses Back

**73%**

of organizations struggle with data silos that block critical insights

**67%**

of businesses are still trapped in legacy systems that limit growth

**85%**

of companies lack AI adoption across their data operations

**92%**

of data projects fail due to poor data quality and manual processes

### The All-in-one Solution for Your Data and AI Challenges

FLIP is a comprehensive platform designed to empower your business with seamless platform migrations and AI-powered workflows.

### Stand-Out Features

#### Powerful Data Manipulation

Transform complex data, enhance quality, and streamline workflows

#### AI Tools for Operational Excellence

Access AI agents that speed up data analysis, enhance information retrieval, and more

#### AI-Powered Document Processing

Save time and effort with AI-powered financial document and invoice processing

#### Automated Data Pipelines

Simplify data integration and transformation, reducing manual tasks and errors

## Seamless Data and RPA Migrations

Automate the transitions from legacy systems to modern platforms with ease

## Effortless Platform Integration

Connect FLIP with your existing systems for smooth data flow and seamless operations

## Migration Accelerators

 + a b | e a u →  Power BI

 Microsoft SQL Server Reporting Services →  Power BI

 Microsoft SQL Server Integration Services →  Microsoft Fabric

 Microsoft SQL Server Analytic Services →  Microsoft Fabric

 Azure Data Factory →  Fabric Data Factory

 UiPath →  Microsoft Power Automate

 crystal reports. →  Power BI

## The FLIP Advantage

 **90%** increase in data processing efficiency
