

Migrating from Tableau to Power BI

Migrating from Tableau to Power BI is essential if you’re looking to leverage the power of the Microsoft ecosystem. With our FLIP Migration Platform, the migration process is fully automated, significantly reducing time, resources, and costs. As a Microsoft Solutions Partner for Data and AI, and with a Microsoft MVP on our team, we ensure seamless data migration to Power BI.

Efficient End-to-End Migration Process Facilitated by FLIP Migration Platform

Table and Relationship Replication

Automates the migration of data structures and relationships from Tableau to Power BI, ensuring accuracy and functionality.

Measure Conversion

Converts Tableau’s calculated fields into Power BI’s DAX language, maintaining accuracy with minimal manual effort.

Visual and Dashboard Rebuild

Recreates visuals and dashboards in Power BI, ensuring consistency in design and functionality.

AI/ML Enhancements

Future integration of AI/ML will automate formula conversion and pattern recognition, streamlining future migrations.

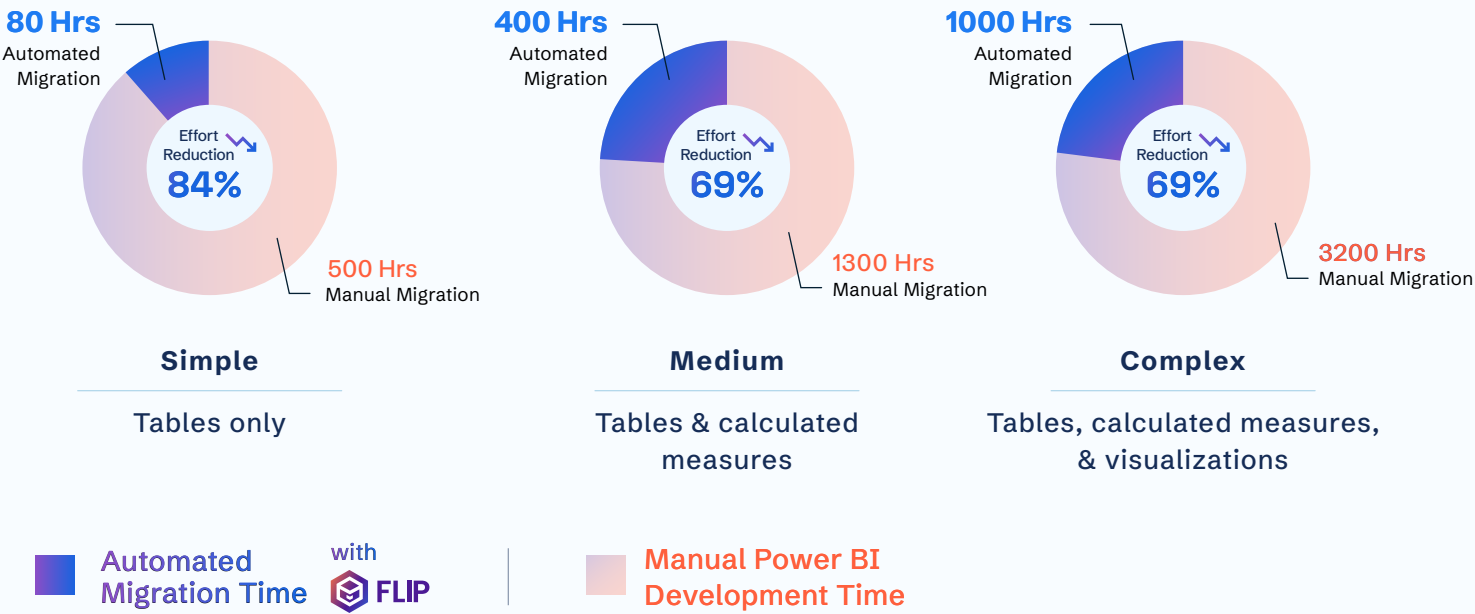

ROI Realized with Automated Migration

Estimated Time Savings
