- Protect Customers from threats

- Report on current state of customer's security posture

- Improve a customer's security posture by providing discoverability, visibility, guidance, and control

- Compare with benchmarks and establish key performance indicators (KPIs).

Customer Gains

- Drive enablement and adoption of licensed features under their license agreement

- Customers can benefit from benefit from improved security measures that protect their identities, apps, and devices.

- Customers will have visibility into their security metrics allowing them to make informed decisions and prioritize security enhancements.

- Customers can achieve cost savings through optimized resource utilization, streamlined processes, and reduced security incidents. Altron's expertise in compliance ensures that customers meet regulatory requirements and avoid potential penalties or data breaches.

Altron's Unique Differentiators

- **Centralized Dashboard:** A centralized dashboard within the Microsoft 365 Defender portal provides customers with a unified view of their security status across identities, apps, and devices. This centralized approach simplifies monitoring and management tasks, enhancing efficiency and visibility.

- **Secure Score Recommendations:** Altron leverages Secure Score recommendations to guide customers in implementing security best practices. This proactive approach helps protect customers from threats, improve their security posture, and prioritize security enhancements based on industry benchmarks.

- **Comprehensive Security Reporting:** Altron provides detailed reports on the customer's security posture, including strengths, vulnerabilities, and areas for improvement. These reports offer actionable insights, allowing customers to make informed decisions and prioritize security initiatives effectively.

- **Four Pillars Focus:** Altron's solution focuses on four key pillars - Identity and Access Management, Endpoint and Device Management, Data Protection and Governance, and Support and Maintenance. This comprehensive approach ensures holistic management across all critical aspects of the Microsoft 365 environment, addressing security, compliance, and operational needs.
