

## Cloud Video Interoperability Solutions for Microsoft Teams

**Altron Managed Solutions offers Microsoft Certified, Cloud Video Interoperability (CVI) solutions that enable professional SIP and H.323 video conferencing systems and room legacy hardware to join Microsoft Teams as if they were native Microsoft clients. CVI platforms bring the power of Microsoft Teams video meetings to your existing room system investments without the worry of long and expensive transitions. CVI enables organizations to maximize the utility of current hardware investments by connecting Cisco, Poly, Lifesize and other standards-based room systems to Teams, while mitigating the need to purchase all new room systems.**

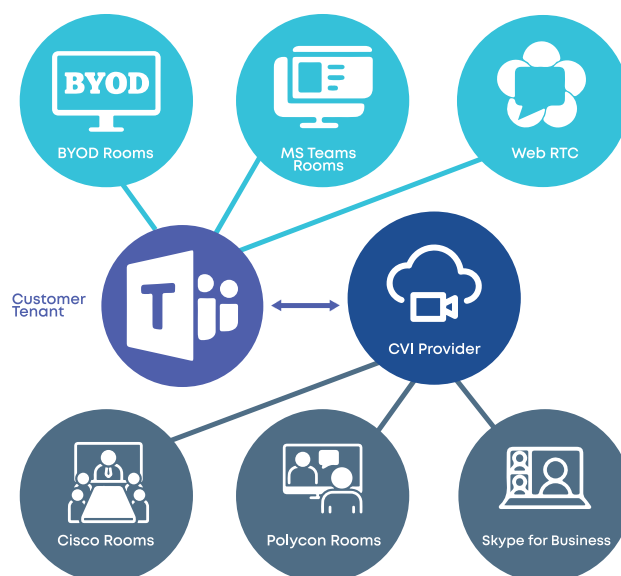

With Microsoft Teams, you get rich online content collaboration in meetings that include audio, video, and content sharing. This can be enjoyed through the desktop and web client, as well as through many partner devices that integrate natively with Microsoft Teams. Altron Managed Solutions CVI platform unites the widest variety of meeting solutions while enabling everyone to seamlessly join Microsoft Teams meetings with native Microsoft Teams workflows.

To help alleviate user complexity and expand the possibilities of your current video conference meeting rooms, Altron Managed Solutions offers additional device-based licensing bundle called Enterprise Room Connector. Enterprise Room Connector encompasses everything you need to connect your video conferencing rooms and make hosting and joining video meetings a pain-free experience.

Our Premium Enterprise Room Connector includes:

- Interoperability with Microsoft Teams or Google Meet
- Virtual Meeting Room
- Endpoint subscriptions, registration/provisioning, and phonebook
- One-Touch Join / Meeting Connect
- Trusted devices / lobby bypass
- Business-to-business calls and firewall traversal
- Custom domain
- Custom branding
- Bring your own carrier (BYOC)
