

Microsoft Dynamics Business Central SaaS Solutions

We're very excited about the newest addition to our portfolio of business solutions, Microsoft Dynamics 365 Business Central. Business Central is for companies that have outgrown their entry-level business applications or manual handling of critical business processes. It offers an end-to-end solution for financial data, sales, service, and operations. This is in line with our thrust of digitally transforming small and medium corporations by bringing them to the cloud. These SMCs form the heart of the Philippine economy, and we enable them with powerful solutions that put technology in the hand of their frontliners and their entire workforce, improving and automating work, but more importantly bringing data from tiny day-to-day transactions into core business systems.

Microsoft 365 Migration and Productivity Solutions

More than just selling office software, our Microsoft 365 solutions focus on enhancing productivity and accelerating business growth by weaning entire workforces away from legacy applications, freeware, and pirated software. With the power of Microsoft 365 on the cloud, we enable frictionless collaboration and drive efficiency. Building on familiar tools and industry-leading apps, we empower organizations to better collect and learn from their own data. On this platform, we eventually introduce the power of business analytics and artificial intelligence. All this, on the world's most secure business platform from Microsoft. A leading example of our work in cloud migration, productivity, and adoption is our massive, organization-wide engagement with Rustan's Commercial Corporation. We are also partnered with the commissary of McDonald's Philippines, Advance Food Concepts Manufacturing, Inc. As a Microsoft Education Partner, we have also driven adoption and migration programs for the Philippine Normal University.
