

SYNCLLOUD

SynCloud is about more than merely cost reporting.

It is a solution leveraged by organizations to avoid overspending on cloud and optimize their cloud spend in a multi-cloud environment. SynCloud supports:

FEATURES

COST CONTROL

- A complete picture of cloud costs with combined usage information and cost data
- Omnichannel communications for seamless experience across budgeting and cost control over all your cloud services
- Control over cloud costs while maintaining application performance

Predictive Forecast

- Visualization of cloud usage trend with forecasted future costs via machine learning
- Intelligent decision support for managing existing or prospective cloud services or applications
- Visibility to assist in making the right cloud spending decisions

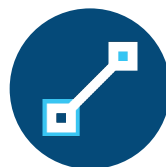

AI Colleague

- Instant response to cost-centric questions
- Recommendations for reducing wasted cloud spend and idle resources
- Convenient access to monthly billing reports across all your clouds
- Alerts for users or managers of overruns or anomalies in cloud spend
