

AIMBEST, a CV screening, assessing and matching solution powered by AI that can quickly evaluate a large number of resumes from job applicants and find the most suitable ones for specific job openings. AIMBEST is designed to help companies handle a high volume of job applications in the most efficient way and fast track the talent recruiting process.

ACCELERATE HIRING SUCCESS

Job Openings Preloading

No additional skills are required to preload job openings with various requirements like job qualifications, personal attributes, salary range, and technical skills

AI-Powered CV Screening

Seamlessly import candidate resumes from emails into the CV assessment system and discover top candidates with semantic search - key information like job titles, skills, qualifications and experience can be evaluated by machine learning algorithms to match the best candidates for the job

Comprehensive Report

A one-page report shows how well a candidate matches the job based on their education, experience, technical abilities and other factors

Candidate Recommendation

Scores will be generated to provide insights into the suitability of candidates for the top 3 job openings, while the comments offer detailed assessments of how well they meet the required qualifications

Interview Insights

The report captures candidate concerns and hidden potential, serving as a valuable tool to enhance the interview process
