Overview

KCS mobility services seamlessly integrates business workflows to render engaging and simplified mobile solutions. Backed by strong domain and tech expertise, we enable enterprises with mobility solutions that integrate processes as well as operations and easily connect with the people or the markets. Our designs are technology and device-independent so users can stay connected on any device.

As a trusted mobility solutions provider, our professional teams have an in-depth understanding of Sales Force Automation, Field Service Applications, Mobile Internet Sites, CRM, and Location-Based Services.

KCS also offers a complete gamut of tech expertise that helps utilize technologies such as Bluetooth, QR Codes, SMS and MMS, GPRS and NFC (Near Field Communication) for the development of apps.

Our Offerings

KCS offers a complete gamut of mobility solutions to help clients implement comprehensive mobility strategies and innovative solutions across different platforms and devices.

App Modernization

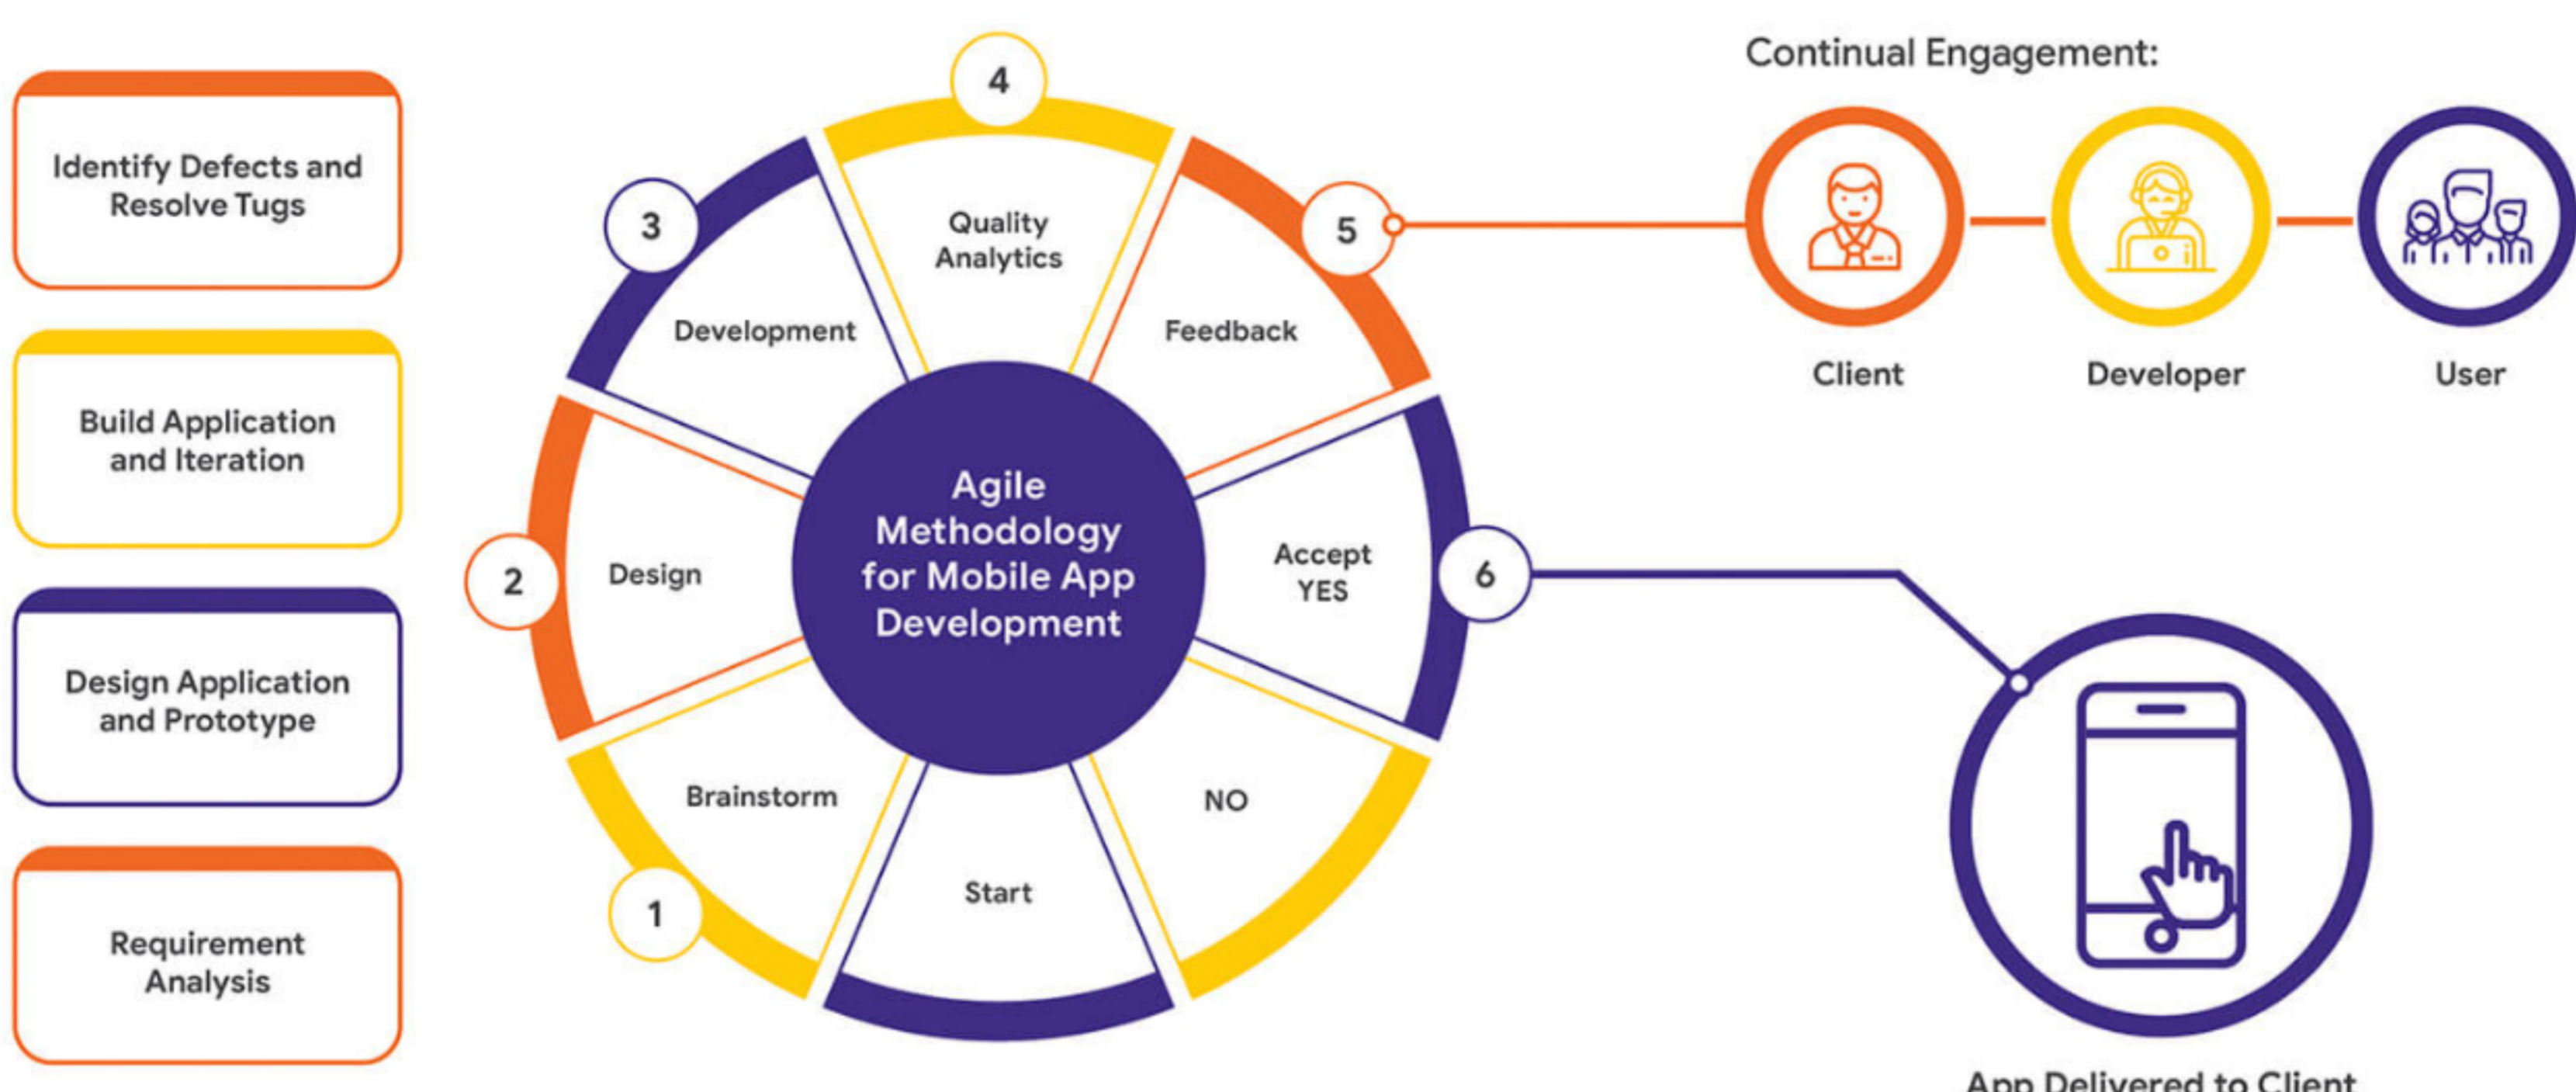

KCS offers robust Mobile App modernization services for app migration and re-platforming of legacy applications. Reduce operational costs and maintain smooth operations while ensuring phenomenal improvement in productivity and revenue!

Mobility Software Services

KCS renders standardized mobility software solutions ranging from device configuration to enrollment to management to advanced mobile security controls and updates to assist you in every stage of device lifecycle.

Go Mobile, Become Agile

We help enterprises accelerate their performance with driving-edge mobility solutions
