# The Migration Business Case

Is it time to consider a migration?

Is your current Microsoft SharePoint installation in or nearing end of support?

Does your business lack access to the latest features?

Are you using the new Power Platform?

Are you using the best of breed 3<sup>rd</sup> party products?

Is your current Microsoft SharePoint installation secure and updated with the latest patches?

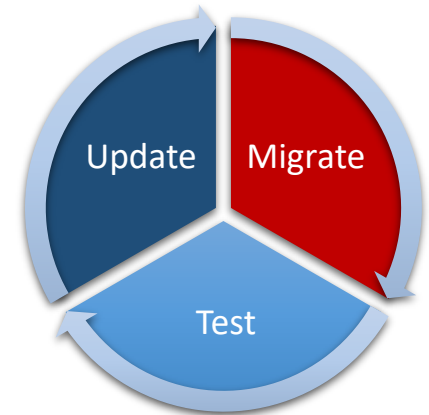

Is the performance of your current Microsoft SharePoint installation sufficient to meet the user demand and expectations?

# Proven Methodology & Expertise

We have many years of experience building, supporting, migrating, and administering SharePoint.

We use a proven iterative approach (migrate, test, update) to migrations, saving our clients time and money, while mitigating downtime.

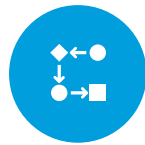

We automate the migration of your data using selected tools, custom coding using PowerShell scripts, or writing client-side object model code.

# Migration Best Practices

Identify what is in  
your current  
environment

Design your new  
environment

Plan a migration  
before implementation

Utilize a test  
environment

Use real data  
when testing

Test identified  
scenarios

# Develop your migration road map

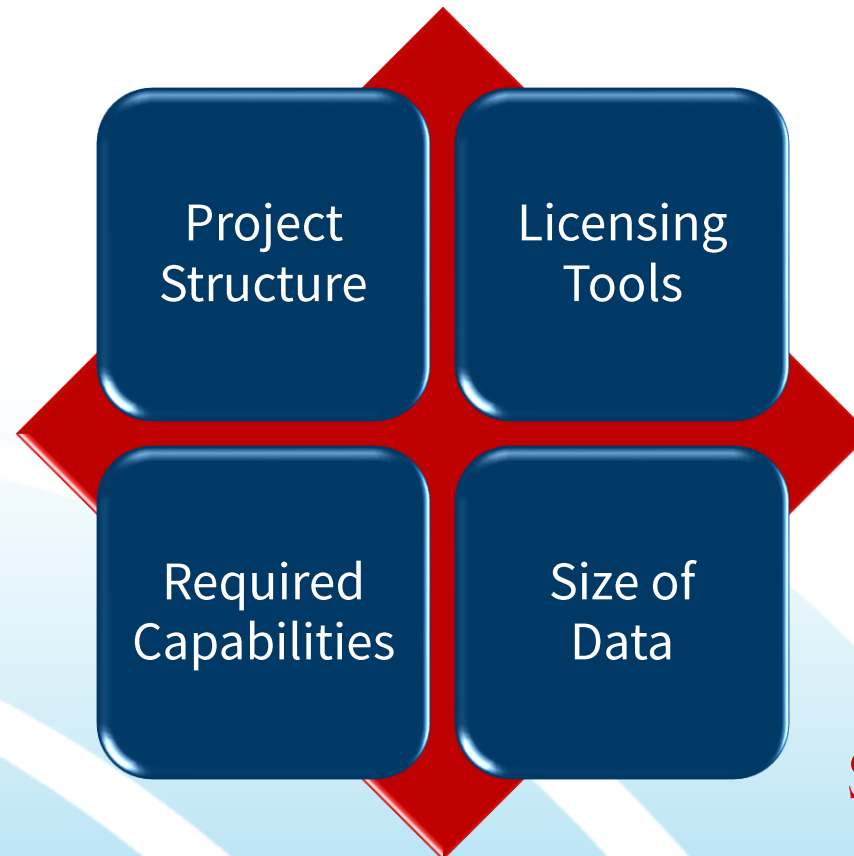

Do you need help figuring out how to get started with migrating your current SharePoint installation? The first step is mapping out your migration.

- SharePoint on-premises vs. SharePoint Online
- Architecture
- Hybrid approach
- Installations
- Administration & maintenance
- Licensing

# Choosing a Migration Tool

We can help you understand what migration tools are available and which tool works best for your business and data. Also, we have experience using a variety of tools so we can help you understand how to use them effectively.

# SharePoint 3<sup>rd</sup> Party Products

The SharePoint platform has 3rd party products that are available to use with it. These products add value to SharePoint with features and functionality that is not readily available by the platform. We partner with companies that provide products in the SharePoint ecosystem and have extensive experience migrating with these tools.

The logo for Nintex, with the word "NINTEX" in a bold, black, sans-serif font. The letter "X" is stylized with a red and orange gradient.

Certified PARTNER

The logo for Powell 365, with the word "Powell" in a bold, black, sans-serif font. The letter "P" is green. To the right of "Powell" is a green square containing the number "365" in white.The logo for SharePoint Migration Services, with the word "SHAREPOINT" in a bold, red, all-caps sans-serif font. To the right of "SHAREPOINT" is a red square containing a white "S" icon. Below "SHAREPOINT" is the text "MIGRATION SERVICES" in a smaller, blue, all-caps sans-serif font.

# Customer Success Story

## SharePoint 2016 On-Prem → SharePoint Online

### Customer Pain Points

- Time & costs of continuous maintenance of on-premises servers
- Lack of latest & greatest features

### Our Approach

- Evaluated and documented current environment
- Recommended and selected migration tool
- Performed test migrations
- Migrated production environment

### Results

- Users are happily using SharePoint Online with no issues

*“Keller Schroeder has in-depth knowledge of SharePoint and this was very apparent during our migration to SharePoint Online. They did a great job of collecting requirements, explaining the migration process in terms the audience understood, and always produce great results.”*
