'Challenger' for SAP S/4HANA based on delivery excellence, innovation investments, and client satisfaction.

Comprehensive Services for SAP on Azure

Reimagine Your SAP Landscape in the Cloud

Assessment & Advisory

Business case, system analysis, code review, integration mapping

Accelerated Migration

Trial instance migration, downtime optimization, cutover strategy

SAP RISE Enablement

Private Cloud RISE architecture, license planning, DR/BCP strategy

Support Services

Post-migration managed services and ongoing cloud governance

SAP Implementation

Greenfield, Brownfield, and Lift-and-Shift capabilities

Support Services

Integration with Microsoft ecosystem – Power BI, Copilot, AI Builder

75% of ERP workloads are expected to move to cloud in next 3 years

Traditional on-prem SAP systems limit agility, scalability, and innovation

Microsoft Azure offers the ideal hyperscale environment to:

- Reduce TCO
- Enable intelligent ERP with native AI/ML
- Deliver faster innovation cycles

Our SAP on Azure Migration Approach

Assessment	SAP Readiness Check, Azure design planning, and detailed cost-benefit analysis
PoC Migration	Trial migration of sandbox system to Azure with performance validation
Landscape Setup	Define security architecture, connectivity, backup, and DR/BCP strategies
Migration Execution	ECC to S/4HANA or RISE conversion using SAP best practices and tools
Validation & Cutover	Functional testing, UAT cycles, downtime planning, and go-live readiness
Support & Monitoring	Post-migration AMS, performance tuning, & roadmap-driven improvements

Security & Compliance by Design

Enterprise-Grade Security

Aligned with SAP and Azure security architecture and compliance frameworks

Access Control & Governance

Robust identity management, user roles, and access policies

Resilience & Recovery

Built-in backup, recovery, and disaster recovery strategies

Regulatory Compliance

Meets global standards like GDPR, HIPAA, and ISO 27001

Proactive Threat Management

Zero-trust network posture and continuous threat analytics

40-60%

Reduction in infrastructure and operational costs

30%

Faster SAP deployment lifecycle with automation

99.99%

Uptime with Azure Availability Zones

100%

Compliance with enterprise security & governance policies

∞

Innovation with AI, Copilot, Power BI, and Azure-native tools

25%

Improvement in IT and business team efficiency

Let's Build the Future
Together
