

DATA PLATFORM

Assessment

The Data Platform Assessment serves as typical starting point for the large-scaled data initiatives. We either start in a greenfield approach or build on an existing corporate data infrastructure.

Our objective is to craft a technical reference architecture and a thoughtfully planned roadmap that are custom-tailored to address the organization's business goals.

YOUR BENEFITS

The Data Platform Assessment ensures the starting point for the Cloud adoption of enterprises and serving as foundation for developing a secure, high-performing, and scalable data platform.

Our design approach assures that the architecture evolves alongside each use case, allowing for the creation of new, measurable business value at every development stage.

Our complimentary skill sets at KI group and wide range of experience in the digital and data space allows us to thrive and enjoy creating maximum impact on every challenge we face.

With over two decades of expertise in establishing data-driven organizations, we back our approach with a comprehensive end-to-end portfolio. This includes everything from strategy, business, development, operations, to empowering all stakeholders.
