

# Microsoft Fabric Technical Training

The Microsoft Technical Training is designed to provide participants with a comprehensive understanding of the technical features of Microsoft Fabric while promoting practical use of the tool. The training begins with a detailed introduction to Microsoft Fabric, focusing on the architecture, components, and integration capabilities of the tool. Participants will gain a basic understanding of how Microsoft Fabric technically performs in terms of data access, storage, and processing. Building on this knowledge, participants will learn through use cases how Microsoft Fabric can be applied in real-world scenarios in an efficient manner.

## Create fast value **YOUR BENEFITS**

The training includes an extensive hands-on session where participants can independently use the tool and gain practical experience under the guidance of the trainer. As a result, after the training they will be able to better understand the technical features of Microsoft Fabric and use the tool more efficiently in their own organization.

Our complimentary skill sets at KI group and wide range of experience in the digital and data space allows us to thrive and enjoy creating maximum impact on every challenge we face.

With over two decades of expertise in establishing data-driven organizations, we back our approach with a comprehensive end-to-end portfolio. This includes everything from strategy, business, development, operations, to empowering all stakeholders.

KI group  
**WHY US**

## How we process **OUR APPROACH**

**FOCUS 1**  
**What is Microsoft Fabric?**

Initial presentation and introduction to the basic concept of the Microsoft Fabric end-to-end SAAS solution enabling participants to understand the structure, purpose, and potential benefits.

**FOCUS 2**  
**Technical Aspects**

Analyzing Microsoft Fabric's technical dimensions, components, integration capabilities, and data processing mechanisms to understand its fundamental structure and leverage its potential.

**FOCUS 3**  
**Hands-on Exercises**

Interactive, hands-on exercises that actively introduce participants to the technical aspects. Under the guidance of experienced instructors, the technical possibilities of the tool are demonstrated.
