

Want to create positive impact in Africa through healthcare? KimboCare gives you a meaningful way to hit your goals.

Sponsoring access to healthcare at large comes with several key questions

Where to act? Whom to impact? What medical problem to tackle? How to ensure we sustainably empower people?

KimboCare has created a platform that provides organizations with all they need to achieve the most measurable health impact in Africa, a prime target for impact.

Organizations purchase quality care packages (health credits) that are gifted to communities in need through a health program designed around a chosen healthcare theme.

A distinct opportunity to step up your ESG strategy and SDG commitment

Partner with KimboCare to advance access to quality healthcare and foster resilient communities in developing regions.

Why work with KimboCare

- End-to-end traceability
- Coordinated access to local infrastructure
- Quality healthcare for every patient
- Compliance, thoroughly vetted partners
- Active role driving a key SDG "health & well-being"
- Attraction & retention of diverse talent

Testimonial

"My daughter heard about KimboCare campaign on social media and told me that not only there was screening but also treatment. The traditional health campaign *kills us twice*. What do you do when you find out you are sick and no money to treat yourself?! You feel powerless and worry even more than when you knew nothing"

Patient, Viral Hepatitis program, Cameroon
