

SUPPLY CHAIN INTELLIGENCE

AI agents that keep your supply chain ahead of change

Maestro Agents and Maestro Agent Studio bring real-time, explainable AI into the planning workflow, helping teams surface what matters, act with confidence, and scale better decisions as complexity grows.

When decisions can't wait

Supply chains shift faster
than humans can analyze.

Alerts pile up.
Data goes stale.

Decisions slow down just
when speed matters most.

Maestro Agents change that dynamic. Built directly into the Kinaxis Maestro™ platform, they continuously monitor live planning data, surface the issues that truly matter, and guide planners toward the best action, right in the moment. With Maestro Agent Studio, teams can extend this intelligence by shaping agents around their own rules, priorities, and workflows without adding tools or technical overhead.

The result is decision making that keeps pace with change, built on a foundation designed to scale.

Why today's decision-making processes fail

Today's reality

Planners are flooded with alerts
but lack clear prioritization

Data is fragmented across systems,
slowing alignment and action

AI insights live outside planning workflows,
creating friction and mistrust

What's needed next

A single, always-current view of demand,
supply, inventory, and capacity

Intelligence that explains why something is
happening and what to do about it

Decision support that scales best practices
without removing human judgment

Maestro Agents deliver this shift, bringing real-time, explainable guidance into the heart of the Maestro platform's concurrent planning environment.

Built on a trusted platform

Kinaxis is consistently recognized by leading analysts for its best-in-class supply chain orchestration and AI innovation. Maestro is trusted to support the planning needs of large, global enterprises, with intelligent capabilities continuously evolving natively within the platform.

Kinaxis

**Leader in the 2025 Gartner®
Magic Quadrant™
for Supply Chain Planning¹**

BB

The companies that figure out how much to leverage both machine learning and AI are going to be much more successful and have a competitive advantage over those who do not.

CHIEF FINANCIAL OFFICER, PELOTON

AI agents that accelerate action from insight

Real-time, embedded intelligence

What it does: Reads live supply chain data to surface emerging risks and opportunities.

Why it matters: Teams act sooner before small problems become costly disruptions.

How it works: Agents run on Maestro's concurrent planning engine, ensuring every insight reflects current reality, not yesterday's snapshot.

Explainable recommendations planners can trust

What it does: Guides users with clear, goal-driven recommendations and transparent reasoning.

Why it matters: Planners trust and adopt AI when they understand it.

How it works: Every recommendation is transparent, auditable, and aligned to business goals such as service, cost, or inventory.

No-code custom agents that scale expertise

What it does: Enables teams to tailor agents using Maestro Agent Studio—no code required.

Why it matters: Expert decision logic becomes consistent and repeatable.

How it works: Custom agents work within Maestro's data, governance, and reasoning framework, so they scale safely across teams and regions.

More value as you grow

Maestro Agents are built on Kinaxis Maestro, the end-to-end supply chain orchestration platform engineered for speed, scale, and change.

A unified data foundation ensures agents operate on consistent, trusted information across planning domains. Shared intelligence keeps decisions synchronized as conditions evolve. And an extensible architecture allows organizations to start with prebuilt agents and expand thoughtfully, without re-platforming or introducing silos. This isn't AI bolted onto planning. It's intelligence designed to grow with it.

Start focused. Expand with confidence.

Maestro Agents deploy as part of the Maestro platform—no new interfaces, no separate data pipelines, no disconnected tools. Most teams begin with a small number of high-impact agents, see value quickly, and expand as priorities evolve.

Built-in governance, security, and human-in-the-loop controls ensure AI enhances decision making while keeping people firmly in control.

A foundation that holds up

Choosing AI for supply chain planning is a long-term decision.

A single, real-time data model that keeps decisions aligned

Explainable, governed AI built for enterprise use

Proven scalability across complex global operations

A roadmap centered on orchestration, not isolated automation

With Maestro Agents and Maestro Agent Studio, teams act with confidence today and adapt as priorities and conditions evolve.

Kinaxis is a global leader in modern supply chain orchestration. We serve supply chains and the people who manage them in service of humanity. Our software is trusted by renowned global brands to provide the agility and predictability needed to navigate today's volatility and disruption. We combine our patented concurrency technique with a human-centered approach to AI to empower businesses of all sizes to manage their end-to-end supply chain network, from multi-year strategic planning through down-to-the-second execution and last-mile delivery.
