KINLY PROJECT DELIVERY

Delivering your MS Teams Rooms

With the world of work changing at speed, this is a pivotal moment for your business. It's up to you to define the future of work in your organisation, finding the right meet, present, co-create and collaboration mix for your people. Here at Kinly, we'll work in collaboration with you to translate that mix into a Microsoft Teams Rooms layout that meets your business' needs and integrates seamlessly with existing infrastructure too.

We believe new technology should be simple – your solution is designed to make working together easier. With that in mind, we layer delivery with technical support so you can rest easy knowing that installation will run smoothly, and your desired solution will be ready to go from day one. To make sure we deliver everything right first time, we only propose and deploy technology that's been validated in our tech lab and we provision every element in our own provisioning centre too, ensuring your entire solution is fully updated and ready to launch before it arrives on-site with you.

Excellent delivery is about more than excellent technology to us. We consider the entire process, from the very first design stages right through to the moment users enter these spaces, so infrastructure preparation is a core part of our project delivery. Using an innovative online portal, we work with you to prepare your business' infrastructure, providing prompts and assistance, or stepping back, when needed. We'll look at management and ownership too, determining where responsibility for different functions lies, then providing technical support and training wherever it's needed. Ultimately, our aim is to deploy your solution without a hitch. Our clear delivery process, and forward-thinking approach to Microsoft Teams Rooms collaboration solutions, means we do just that, every time, from anywhere.

Kinly

OUR JOURNEY TO MICROSOFT COLLABORATION

Expert Kinly teams will be on hand to guide you through every step of the process towards your project's delivery and beyond. Here, everything is designed with users in mind, and that includes every project timeline. Though there's no single framework to suit every single project we undertake, yours will include four clear stages:

Plan

We'll take an end-to-end approach to planning your Microsoft solution.

Deploy

Our experts will ensure your solution is up and running, and ready for all your people to use with ease.

Manage

Choose from our flexible management options to get the best from your assets and avoid over-burdening IT teams.

Support

We can help with both remote and on-site support and, should anything go wrong, we'll be on hand to put it right.

IMMERSE YOUR TEAM IN AN EFFECTIVE HYBRID ENVIRONMENT WITH A KINLY SOLUTION THAT IS:

Scalable

Secure

Easy to use
