

WE ARE A GLOBAL PROVIDER OF AV & VIDEO COLLABORATION

Global Reach

Bringing people and technology together for better productivity wherever the work happens – because great things happen when people work together.

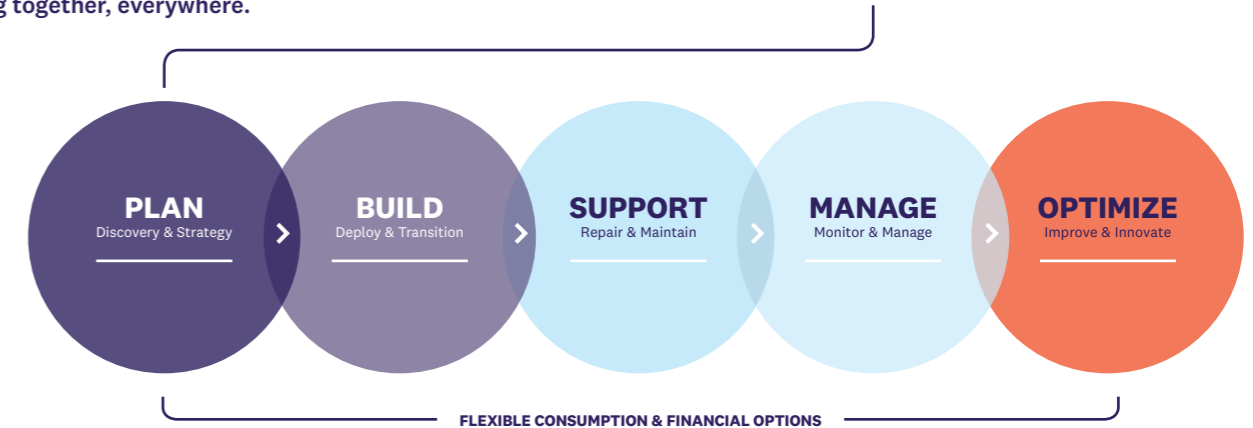

Our Approach

Our approach is anchored in customer success. Instead of starting with technology, we cooperate closely with our customers to examine their needs, wants, and spaces before we design a solution. This way, we can ensure they get exactly the right kind and combination of tools for predictable and reliable ways of meeting and sharing content. **It is no coincidence that Kinly's brand promise is: Working together, everywhere.**

This is where we come in.

The journey towards transformational workplace collaboration

20 years Experience

After 20+ years of experience in the AV and videoconferencing industry, we now have around 1200 employees working with over 2,500 clients across the world—whose success we believe is the key to our own.

EXPERIENCED

Dedicated expertise in planning, supplying, integrating and managing market-leading visual collaboration services.

PROVEN

Globally recognised businesses relying on us for secure and flexible meeting and collaboration services.

INDEPENDENT

A leading partner with the world's top vendors to deliver the best choice of solutions for public and private sector businesses.

SCALE

An end-to-end provider of workspace transformation services worldwide.

A Diverse Portfolio

We can handle any part of a complete hybrid workspace transformation, from a simple info screen to dedicated meeting rooms; from a range of subscription-based services and support to highly advanced control rooms with military-grade cybersecurity.

Regardless of project size, we support every part of the process from start to finish (including post-installation management), to ensure a lasting harmony between the solutions we provide and the people who use it.

Our Technology

Technology is essential for this success. But it can be difficult for an IT department to find, install, manage, and troubleshoot a range of collaboration technology on top of their other tasks - especially when there are several different brands and platforms in play. That is where we come in.

Dedicated expertise in planning, supplying, integrating and managing market-leading visual collaboration services.

This is our promise - this is the Kinly way

In short, we work together to provide whatever it takes for our clients to reach their collaboration goals. Because when they succeed, so do we.

Working together. Everywhere.
