

Analytics in a Day Workshop

A half-day, hands-on workshop to get you started on cloud analytics.

An enterprise that does not manage, govern, and secure its data will not survive in the new economy. Analytics in a Day is designed to simplify and accelerate your journey towards using an end-to-end analytics platform to power your business.

The updated half-day workshop and hands-on lab incorporate all the latest features of Azure Synapse Analytics. See how you can accelerate time to insight with the unified experience that brings data ingestion, enterprise data warehousing, and big data analytics into a single service.

In our workshop, you will better understand how to:

- Create an analytics pipeline that goes from data ingestion to insights using Power BI.
- Empower self-service analytics.
- Enable a truly data-driven culture in your business.

Agenda:

Full and Half-day Options Available

- ▶ 9:00 - 10:00
The heart of analytics
- ▶ 10:00 - 11:00
Optimizing analytics with Azure Synapse

Insights for all with Power BI + Azure Synapse
- ▶ Break for 15 min
- ▶ 11:30 - 1:00
Hands-on lab using the Azure Synapse Studio

\$2,000

Common Questions:

How can analytics transform my data from a cost center to a resource?

How do we use dashboards and reports to support awareness of the current state of the business?

How can BI and visualization strengthen our knowledge workers with informed insight?

Can augmented intelligence discover information and patterns that even experts overlook?

Are all analytics of equal value?
