

# Teams Solution Workshop Home Healthcare Field Kit

Improve Care Giver Experience | Strengthen Privacy and Compliance

## Provide more care and less paperwork.

**Interactive workshop:** This workshop is an interactive engagement for healthcare organizations looking to understand how mobile apps built with Teams and the Power Platform can reduce cost and increase the efficiency of healthcare workers in the field.

Replacing paper-based forms with mobile apps that run on any device significantly increases productivity by reducing or eliminating errors in data collection and allows for the automation of reviews, audits, and retention policies.

The seamless integration with Microsoft 365 enables better collaboration between firstline workers and supporting staff while securing sensitive information with Azure Active Directory Identity and Access management and adherence to existing information protection and compliance policies.

## Agenda

- ▶ Overview of Teams Solution and Mobile Apps for Firstline Workers
  - Appointment Scheduling
  - Client Evaluations
  - Digital Signatures
  - Scanning client documentation
- ▶ Envisioning Customer Specific Scenarios and Personas
- ▶ Review customizations and integration with Line of Business Application
- ▶ Demonstration of Home Healthcare Field Kit tailored to address customer-specific scenarios
- ▶ Roadmap for pilot implementation

**This workshop can be delivered on-site or remotely.**
