

Microsoft 365 Compliance Assessment

As compliance becomes increasingly important for your organizations, it can be a challenge to keep up with the constantly evolving world of data compliance.

The Microsoft 365 Compliance Assessment helps organizations navigate regulatory and privacy requirements, ensuring compliance with security control frameworks such as NIST, CMMC, and CIS Controls. It includes workflow capabilities, detailed instructions, and a risk-based compliance score to improve compliance practices. From PCI DSS, SOX, to CCPA, this assessment empowers organizations to meet regulatory obligations and align with these industry leading security control frameworks.

Our team at KiZAN can provide guidance on completing tasks to improve your organization's compliance. We can identify improvement actions and provide guidance on completing them. By utilizing the Microsoft 365 Compliance Assessment, you can effectively address Azure, M365, and multi-cloud compliance challenges

By aiding organizations in meeting regulatory and privacy mandates as well as simplifying compliance management. This assessment not only ensures compliance but also positions organizations to win over new business from companies that mandate adherence to such frameworks. The Microsoft 365 Compliance Assessment can assist with completing risk assessments, provide step-by-step instructions on suggested improvement actions, and track progress in completing improvement actions.
