Data Platform Modernization

Act now to take advantage of this unique opportunity... No Cost for Approved Customers!

This fully-funded pilot will provide a modern data platform to standardize and modernize your data estate and will also illustrate how Azure Synapse and Power BI can economically deliver transformative insights within your broader IT and BI ecosystem.

This 6-week pilot will consist of 3 phases, during which KiZAN will:

- ▶ Deploy a pilot implementation of a Modern Data Platform.
- ▶ Provide hands-on opportunities to work with Power BI and Azure Synapse in your production environment.
- ▶ Develop an actionable plan to assist with a full production deployment of Power BI and Azure Synapse.

Customers using Azure Synapse and Power BI are achieving:

271% Average ROI

27% Faster Time to Insights

26% Lower Total Cost of Ownership

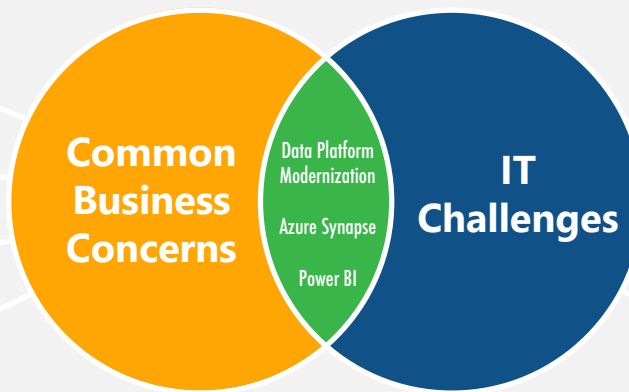

How can we drive new traffic and deliver personalized insights?

How can we improve customer experience?

How can we improve performance and reduce OpEx?

How can we improve inventory management and shipping?

How can we reduce downtime?

How do I build the case to invest in the right areas?

Should I consider running my own datacenter?

How can I secure my data and assets from attackers?

How will my staff adapt to the steep learning curve?

How can I ensure my business continues to run without interruptions?
