

**REDUCE RISK.
INCREASE SECURITY & COMPLIANCE.**

DID YOU KNOW?

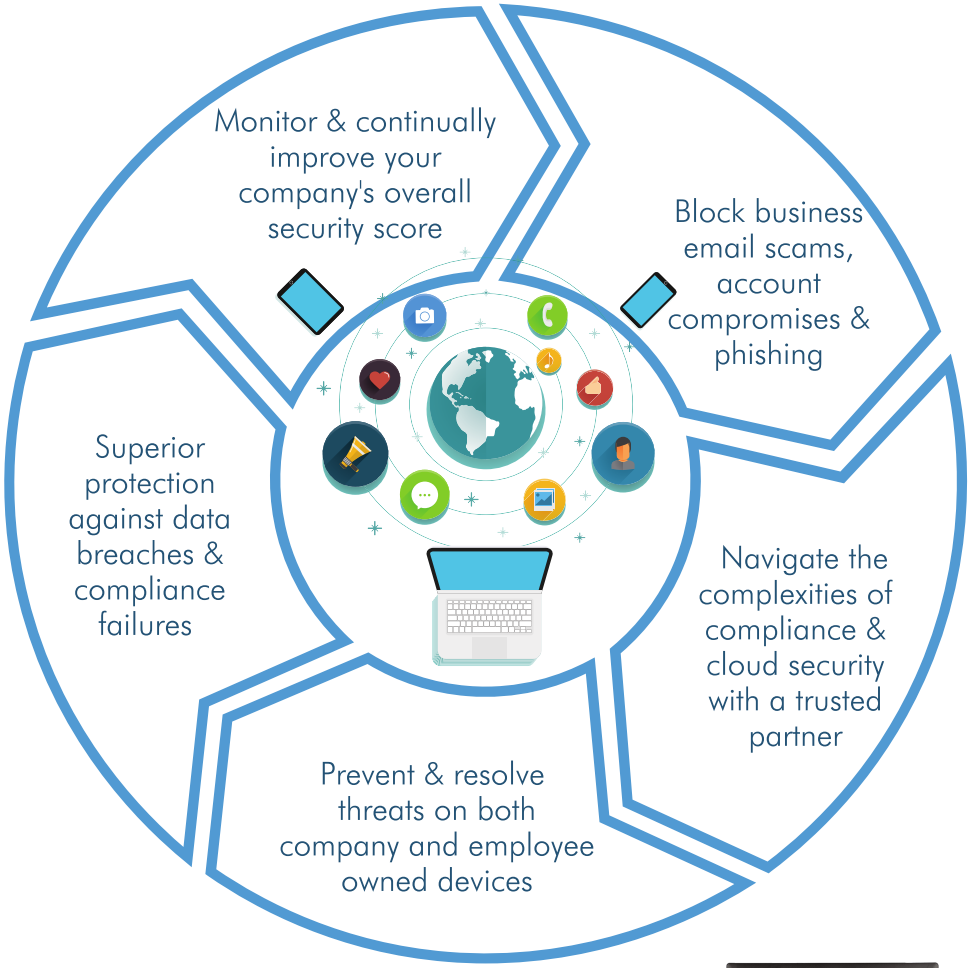

Through 2022, at least 95% of cloud security failures are predicted to be the customer's fault.

A service provided by

PHASE 1

Setup Azure AD Tenant	Setup Azure Active Directory within Office 365 tenant
Enroll Endpoints	Create User Guide
Endpoint Encryptions	Deploy Test Group and then deploy remaining computers
Self Service Password Reset	Determine test user group; determine final group; setup SSPR for test group and test and then setup remaining group with SSPR
Multi-Factor Authentication	Create MFA policy for Office 365 access; apply to test group; create 1 conditional access policy; apply to test group and then verify functionality
Email Encryption	Determine encryption key word; create transport rule; apply to test group and then verify functionality
Autopilot Setup	Enroll endpoints and mobile devices (10 endpoint / 10 mobile); create list of assets to be enrolled and launch enrollment

After this initial deployment, Klarinet Solutions can provide ongoing security services “as needed” to continue to deploy new security measures, improve your Microsoft secure score, and map industry compliance requirements to remain compliant. This initial deployment is to establish a baseline of good techniques, but cloud security requires constant attention in order to continue to protect against new threats which are created daily.
