

KMELEON

Driving Your **Evolution** is in Our DNA

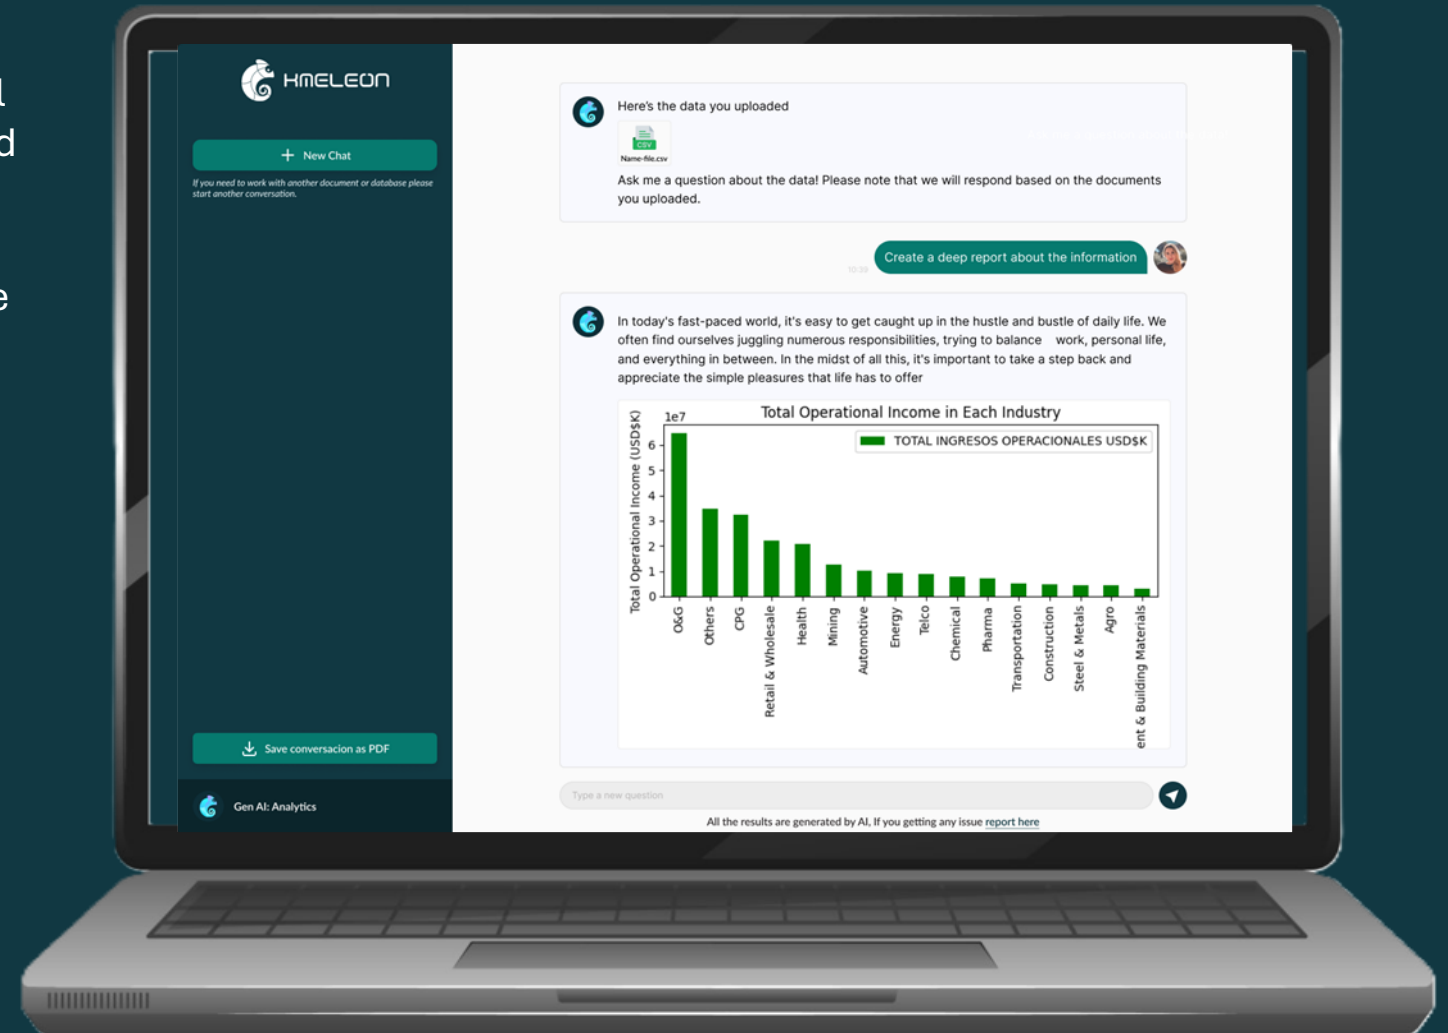

# AI Analytics Agent

# AI Agent – Analytics

This solution connects to any internal numerical database to answer questions, gain insights, and create reports in seconds, securely. This AI connects to any internal numerical database to provide answers, generate insights, and produce reports in seconds, all with security in mind.

## Key Features:

- Chat with data
- Analytical question answering
- Graph and report creation
- Projection generation
- Context and memory
- Continuous learning

# Objectives

## **Automation and Efficiency:**

Automate inventory analysis and raw material management to reduce costs and provide real-time recommendations.

## **Generative AI-Driven Analysis:**

Develop an AI-based agent to analyze inventory and demand data, generating detailed reports.

## **Application of the Theory of Constraints:**

Leverage the Theory of Constraints to optimize inventories and minimize bottlenecks in the supply chain.

## **Market Differentiation:**

Position the solution as superior to competitors, highlighting up to 15% savings and faster implementation.
