MXDR for SMB

Defend What Matters: Scalable Protection for Small & Medium Business

KMicro unites human-led expertise with Microsoft Defender XDR to investigate incidents across endpoints, Office 365, cloud applications and identity.

Enterprise-Grade Managed Detection and Response Tailored for Small and Medium Sized Businesses.

- Cybersecurity incidents are more common than ever in headline news
- Business value can be lost due to poor management of security investments
- A lack of security expertise can weaken security posture

20%
Reduction in the likelihood of a breach long with improved security posture

40-250%
ROI over 3 years

50%
Savings in additional headcount for internal IT and security team efficiencies

Experience what it's like to have a partner in the fight!

Qualified security experts alongside the right technology is essential. Microsoft Security coupled with human-led analysis speeds threat detection & response.

1. **Pease of Mind:** Expert management of your Defender XDR incident queue ensures no threat goes unnoticed

2. **Improved Efficiency:** Prioritize incidents that matter most, reducing alert fatigue and enabling your team to focus on core business objectives.

3. **Maximize your Microsoft investment:** Deploy the Microsoft security tools and the Defender stack you already have and eliminate the headaches and cost of disparate security products.

KMicro MXDR for SMB helps businesses reduce operational complexity and strengthen cybersecurity defenses by managing their Microsoft Defender XDR environment. This managed service ensures proactive, expert-led security without the need for an in-house SOC.
