

Why?

Like all things great, it starts with a why?

Cloud technologies enable business transformation.

Migrating to cloud means much more than just moving workloads. It's the manifestation of business transformation and the execution engine for future growth.

Modernization

Improving customer and employee experiences

Transformation

Evolving how businesses operate and interact with the market

Growth

Scaling products and services to meet ever growing business needs

Business Returns

IT must rapidly produce measurable business returns to stay relevant

Motivations

Cloud adoption and migrations driven by several reasons

- Cost Savings
- Reduction in vendor or technical complexity
- Optimization of internal operations
- Increase business agility
- Prepare for new technical capabilities
- Scale to meet market demands
- Scale to meet geographic demands
- Data center exit
- M&A & Divestitures
- EOL/EOSL for system components
- Technical debt
- Innovation for new

Cloud Migration Practice

What

Cloud Migration practice is a managed approach to migrate any enterprise workloads to cloud

Why

Assess, plan and execute migrations in a structured method to achieve functional setups without disruptions

How

Using combination of advisory level expertise and advanced tooling to provide prioritized plan and execution from migration

Discover your cloud migration journey

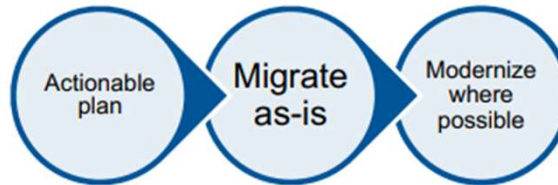

1. ASSESSMENT & PLAN

Process of assessing current state, identifying needs, and scoping the migration

2. MIGRATE & MODERNIZE

Align solution migration and modernization with assessment plan

3. OPTIMIZE & MANAGE

Prepare solution for ongoing operations, governance, and security

Migration Practice

Our migration practice is a collection of runbooks, best practices, documentation and way to organize ourselves in alignment with Microsoft's CAF practices.

A standardized way to successfully conduct large scale migration projects with minimal overhead and maximum confidence, together with tooling/automation and advisory grade artisan work for the jagged edges.

Each of the Plan – Ready – Adopt steps is governed with a milestone prerequisite.

Azure Migration Practice – 10 weeks implementation

Our Cloud Migration Practice will onboard you and your applications in a sustainable manner to Azure Cloud to enable further growth and scale.

Our audited and proven Migration Practice is all about standardizing, documenting and creating best practices for cloud adoption and migration journeys. We will bring our best in order to migrate and modernize your estate to Azure Cloud. In the heart and soul of this 10 weeks implementation is extensive Discovery and Assessment in building you the business case and justification for you cloud adoption, as well as creating and applying the proper transformational strategy suitable for your case and landscape.

After discovering and assessing we shall design together the optimal plan and blueprint in migrating, securing and operating your workloads to Azure.

This offering is an implementation offering for conducting E2E migration. For adopting cloud foundation, core and governance please see our offering for Cloud Core and Governance Primer.
