

Data Platform Assessment: 1 Day Workshop

Knowit Solutions

1 day assessment to understand the current state of your data platform solution

Do you have issues and aches with your current data platform solution? Are the needs for new data fulfilled too slowly? Does the current platform have increasing costs and low return-on-investment? Does your analytics team suffer from constant data errors which are not easy to prevent or mitigate?

Knowit is a Microsoft Gold Level Partner which has extensive knowledge on assessing current data solutions and designing the next steps to take when modernizing your data platform.

Microsoft Azure's latest cloud technologies combined with our wide hands-on knowledge on data operations can bring you substantial process improvements and cost savings. You will have a plan for stable and agile way of development when it comes to data and analytics. We will assess your whole data architecture and development process and give the best models on how to improve the situation.

We will evaluate your data platform and analytics TCO currently and give you an estimation of the cost savings that can be achieved when modernizing the platform with Microsoft Azure.

The assessment deliverables will include a report which allows your company to start the journey on modern data management.

Agenda

- What is Data Platform
- Current state of your solution
- Future development of the data platforms
- Azure Data Platform in 2022
- Continuous development
- Costs and benefits
