Passionate Support for Azure   knowit

Overview

Free up your time to focus on what you do best and let us look after your Azure environments 24/7.

Our skilled and certified team in the Nordics will run and secure your business-critical services 24/7 so you can concentrate on your core business. Through our 24/7 Operations Centre, we provide all key managed Azure services under one solution. Acting as your Azure partner, we help you design, implement, monitor, and maintain all Azure cloud environments to optimize costs and prevent or minimize application downtime. You'll get Azure infrastructure and architecture design competence on demand.

Our local Azure team is the strongest and most responsive 24/7 team in the Nordic region. We offer the technical and operational skills and unrivalled experience in the Azure services and technologies, DevOps operational model, and digital transformation. We take pride in solving issues on the first call.

Opportunities

You can focus on your core business, and we will take care of the cloud core design and implementation, transition and onboarding project, data security and protection with 24/7 managed operations for you. We monitor and maintain your Virtual Machines, App Services, Functions and other Azure services with your business applications and react quickly to possible incidents.

Success Stories

PAULIG
For a life full of flavour.

The largest coffee house and major food organization in Finland, Paulig, adopted a cloud management model that enables business development at the pace required by the digital society. The cloud management model provided by Knowit provides clear rules for operating in the cloud, above all in a secure, agile and business-like manner.

HSY

With Helsinki Region Environmental Services Authority, we developed the connection architecture, which enables the adoption of the Suomi.fi services. It is covered by Knowit's monitoring and support services. The service includes 24/7 on-call services, infrastructure and architecture design services of Azure environments, and implementation
