

Accelerate your sustainable transformation

About sustainability reporting digital assessment:

Our expertise in sustainability reporting provides the facilitation you need to successfully review your needs and implement Microsoft's data collection tool across your organization.

What we offer

With new legislative demands on data collection and reporting, we can provide you with a thorough Gap Analysis of your current sustainability reporting landscape, and what you need to fix to be efficient and compliant with the new CSRD, and the EU's taxonomy.

We also assist and quality assure in the implementation of tools, and most importantly with processes to ensure that you can utilize your data to understand what actions need to be taken to ensure more sustainable business for your company.

Our team of digital sustainability strategists, climate reporting experts, sustainability data analysts and taxonomy specialists assist you in the various stages of the implementation project.

Gap analysis output:

- Understanding of current sustainability strategy and reporting procedures including platforms and IT structure
- Requirements of future needs
- Scope and plan
