

# Accelerate your sustainable transformation

## About taxonomy & CSRD readiness assessment:

Our expertise in sustainability reporting provides the facilitation you need to successfully review your needs and implement Microsoft's data collection tool across your organization.

### What we offer

With new legislative new demands on data collection and reporting, we can provide you with **a thorough gap analysis on your current sustainability reporting landscape**, and what you need to fix in order to be compliant to the new CSRD, and the EU's taxonomy.

We also assist in understanding the needs and assure quality in the implementation of tools, and most importantly with processes to ensure that you can utilize your data to understand what actions need to be taken to ensure more sustainable business for your company.

Our team of digital sustainability strategists, climate reporting experts, sustainability data analysts, and taxonomy specialists can assist you in the various stages of the implementation project.

### Workshop output

- Understanding of current situation
- Understanding of how updated legislation affects processes and reporting in your company
- Which parts of the organization are affected:
  - Consequences and priorities
  - Digital tools and prerequisites
- Recommendations on how to prepare and level up according to new regulations
