Lanka**

**Jaffna, Sri
Lanka**

In charge of
product
development and
innovations.

Software Product Team On Demand

“Over 30% of companies are outsourcing software projects.

Silicon Valley Bank's U.S. Startups Outlook

Agency Model

KochaSoft is a premier cloud applications web development shop/ service that develops custom-built content, learning and web dev projects for our clients.

Products Model

KochaSoft has multiple ready to use product solutions with a multitenant architecture and the latest technologies.

Why Outsource Product Development

“As of 2019, the global market value of IT outsourcing is USD 92.5 billion

Statista

Why are companies outsourcing their software needs?

Having an outsourced team allows them to focus on their core objectives while they create a leaner, aggressive, and stronger operation.

It's an issue of efficiency and focus.

KochaSoft helps you solve capacity problems, cut costs, manage business environments, among others.

The Business Case For KochaSoft

Here's your biggest problem:

Even one ROCKSTAR senior software engineer, CTO, product manager doesn't get you a shipped product.

It takes a team to QA and develop the code.

A full-time team with 2 developers, a designer, and a product manager could cost you \$500,000 per year, plus equity.

Outsourcing development is a fraction of that cost.

\$9.4K

The average monthly salary of just one lead Software Engineer in Canada.

Source: [Payscale](#)

\$3-5K

Average monthly cost of working with KSFT Product Team, comprised of at least 4-6 engineers based on project needs.

Why Trust Us?

Why KochoSoft, and not Fiverr, Upwork or Toptal?

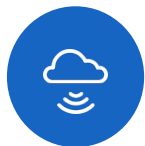

History of Delivering Large IT Projects

Unlike other startups, we started as a division of a large IT department back in 2016. Our original LMS product was trusted by IBM and Google to train their employees.

White-Label License

We develop, you own the code and IP that comes with it. You just pay us once and that's it. No recurring fees.

Accessing a Product Team with Diverse Skill sets

When you hire a freelancer, you're hiring one person to be your project management and your development head, leading to a split focus.

Features

Enterprise Grade

Our applications
boas customizable
API, 24/7 Support
Team and
Single-Sign on
functionality

Mobile Friendly

Our cloud-based
apps are equally
capable on mobile as
they are on desktop
in iOS, Android and
more.

White-Label

Enjoy our product as
though it was developed
in house with your
brand colors and
functionality

Our Customers

YMCA Quebec

Delivered enterprise-grade learning management and data analytics platform for network of nonprofits.

DataWiz Academy

Built a content management system pilot with data science and AI bootcamp academy.

RedSalud CCHC

Large healthcare network dedicated to serving patients through Google-based scheduling tech.

Customer Testimonial

“To reinvent our way of delivering our social impact – especially during a pandemic – turning to digital solutions was key. The YMCA is now better able to reach communities, wherever they are, to offer our programs (virtually).”
