Microsoft Teams
Microsoft Teams meetings

Read full story here

W'th the f ex'b' 'ty and e ast'c'ty we get from us'ng Azure the 'nfrastructure team can move faster wh'ch means the business can move faster."

Bryan Laszlo, Infrastructure Systems Manager, Carhartt

Situation

Iconic clothing brand Carhartt needed more scalable and stable SAP S/4HANA environments to support rapid growth as it transformed its business to integrate retail sales into its traditional wholesale business model.

Solution

Working with Microsoft Partner Network member KochaSoft, Carhartt implemented SAP on Microsoft Azure for its retail business and is now moving its wholesale and e-commerce on-premises SAP environments to Azure.

Outcome

Carhartt now has an elastic but stable environment for its entire SAP estate and with Teams they are helping increase business agility and support its growth.
