

AZURE ARC BASED
MANAGING SOLUTION
HYBRID AND MULTI-CLOUD
MANAGEMENT SOLUTION

- Our custom-made Azure Arc solution is designed to provide you with a centralized, unified way to manage your entire environment together by projecting your existing non-Azure and/or on-premises resources into Azure Resource Manager
- It enables you to manage VM resources of VMware infrastructure with ARC and vSphere
- Features: Our custom-made Azure Arc solution is tailored to manage VMWare on-premise infrastructure and VMs in Azure
- It runs on both new and existing hardware, virtualization platforms, IoT devices, and integrated systems
