komand
CALL HANDLING CONSOLE

Komand is much more than an operator console, it constitutes a true command center that will enable your organization to unify networks, data and communications.

Komand is Komutel's next generation console that offers a wide array of features that facilitate and improve inbound and outbound call handling in a professional manner, thanks to an intuitive interface.

BENEFITS

► Real-time status visualization

► Access to information such as coordinates, title, department, etc.

► Access to various details through its centralized database

► Telephony functions emulation

► High security level access

► Complementary modules such as document management, call management, transfer by history, status management with lights, etc.
