

# FOR ANY INDUSTRY

LivePlan enables live, actionable, interdisciplinary, and automatically optimized asset plans transforming work practices for maintenance and operations.

## WHERE PLANNING MEETS REALITY

A cloud-based solution for optimization of work practices for operations and maintenance.

# WHAT IS LIVEPLAN

LivePlan is a cloud-based solution for optimizing day-to-day operations for industrial facilities. LivePlan integrates all relevant planning and execution data onto one interactive game board, adding layers of live re-planning functionality, automated schedule optimization algorithms, and much more.

With a human-centered R&D approach, we improve operations and maintenance using the right technology.

## WHEN TO USE LIVEPLAN

Engage your entire organization in joint optimization of activities and resource usage.

### MORNING MEETINGS

In a morning meeting LivePlan is used to prepare safe and efficient execution of the day's planned work. It secures fewer and briefer meetings with less preparation work.

### SCHEDULING & PREPARING UPCOMING WEEK

LivePlan is typically used in combination with the maintenance and planning systems to finalize an integrated schedule for execution.

### DISPLAY IN COMMON AREA

LivePlan is also meant to be used as a public shared awareness display that should be strategically placed in your work environment.

### AD-HOC MEETINGS DUE TO UNFORESEEN EVENTS

LivePlan is used to deal with unforeseen events that require the plan to be modified on short notice.

### AFTERNOON STATUS & REVIEW MEETINGS

LivePlan is the key tool in these meetings to keep the schedule updated based on what has happened during the day and to support the next day's work preparation.

## THE VALUE OF LIVEPLAN

- ✓ Up to 30% increased utilization of floor staff
- ✓ Increased tool time by 20-30%
- ✓ Increased plan attainment to 80-90%
- ✓ Reduced Risk & Improved HSSE
- ✓ Reduced down-time
- ✓ Increased production by 5-7%
- ✓ Reduced energy consumption

## ABOUT LIVEPLAN

LivePlan is the outcome of world-leading research on visualization, collaboration, and new work processes at the Centre for Integrated Operation at NTNU and the Institute for Energy Technology in Norway.

With the right technology, there is no limit to what we can accomplish. Our purpose is to make operations and maintenance simpler, more efficient and more intuitive. Simplicity beats complexity.
