kontrol

**The Product Compliance Platform**

Overview

The Kontrol Hub – regulatory requirements at your fingertips

- **Organization of data sets** on market level
- **Synthesized, technical and formalized requirements** with **continuous updates**
- **Collaboration and tagging** functionality
- **Seamlessly compatible** with existing systems and ReqIF export
- **Cost efficiency** and **traceability**
- **Holistic content roadmap** including key ESG and semiconductor regulations
- High **focus on UI/UX** and **ease of use**

Why Kontrol

We **understand the challenges** in regulation-oriented systems engineering, especially in collaboration with OEMs.

We have **experienced your need**s for end-to-end compliance covering the whole development process.

Why Kontrol is different

We can **automate processes** through **inhouse AI-Experts**

We can **derive technical requirements** including dependencies to other regulations, norms, standards and court rulings

Never worry about compliance again, automation paired with subject matter experts have you covered.
