

Kontrol KoPilot – Solution for Validation of Regulatory System Compliance

Overview

The Kontrol KoPilot for regulatory Validation in Simulation

- **Kontrol KoPilot** integrated into 3rd party **Simulation** environments
- **KoPilot** enables **continuous regulatory compliance assessment** during each simulation run
- **KoPilot equipped with ODD-specific requirements-sets** to cater for specific regulatory requirements
- **Independent 3rd party assessment** for manufacturers to decrease **risk** of legal **non-compliance**
- **Reporting and analysis** of results via built-in functionality of simulation environments and **Kontrol Hub**

Why Kontrol

We **understand the challenges** in regulation-oriented systems engineering, especially in collaboration with OEMs.

We have **experienced your needs** for end-to-end compliance covering the whole development process.

Why Kontrol is different

We can **automate processes** through **inhouse AI-Experts**

We can **derive technical requirements** including dependencies to other regulations, norms, standards and court rulings

Never worry about compliance again, automation paired with subject matter experts have you covered.
