Software Evaluation

Pain Have existing custom software but are unsure of it's maintainability. Have existing problems and want to understand effort to correct.

Service Kopis will meet to understand problems and evaluate the code to make a recommendation on how to most efficiently solve your problems.

Software Performance Evaluation/Troubleshooting

Pain Have a known performance problem. Want to identify problem—is it hardware, database, networking, software?

Service Kopis will meet to understand problems and do a holistic evaluation of the environment to pinpoint the issue with a recommended plan to remedy.

Software Selection

Pain Outgrown current software. Haven't decided that there is not a product that will fit needs.
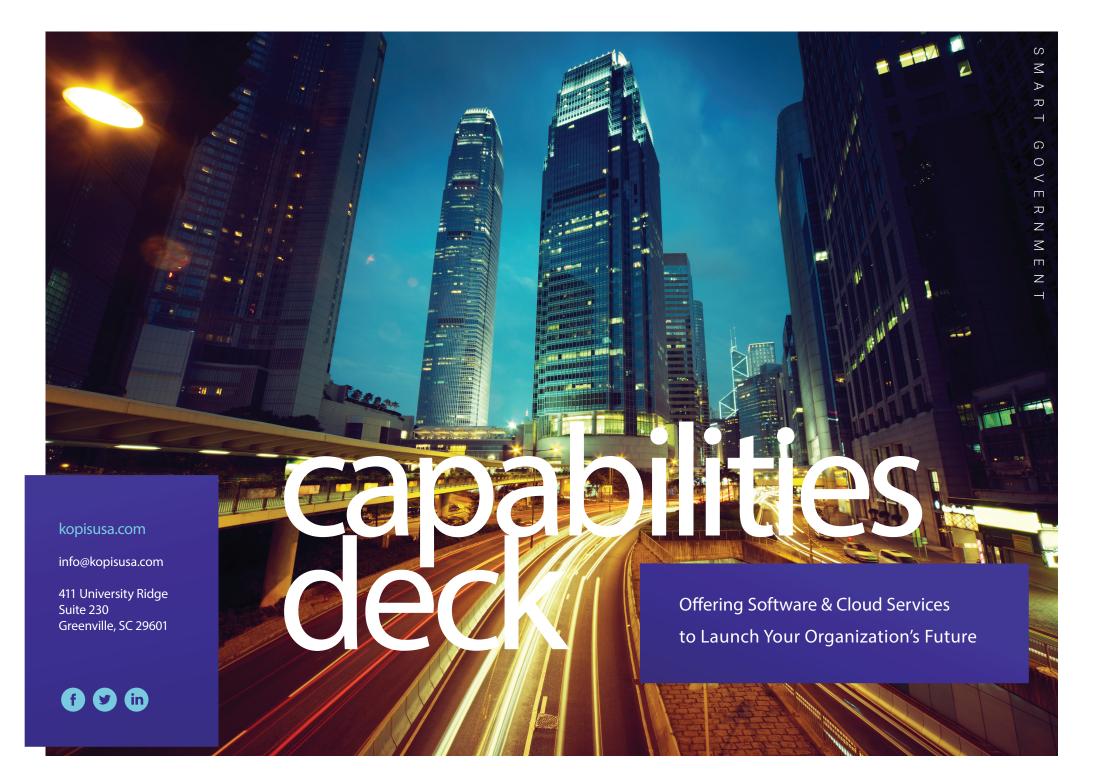

Service Kopis will understand business requirements. Quarterback the evaluation process of software offerings. Goal is to find best fit (Product + Config, Product + Customization, Customization—in that order)

Software Requirements & Design

Pain   i have a software application to write, but I haven't definied it well enough to feel comfortable that it will truly solve my problem, nor do I know my budget well enough to calculate a firm ROI.

Service   Kopis will understand business requirements, create mockups, possibly create prototypes and deliver these along with a project plan and proposal to complete project plan.

Example   Secure Distributed Applications, Landing Pages for Specific Industries/Niches (POS to start)

CREATING

Software Development
Unique solutions designed for your business

- Web Development
- Mobile Apps
- IoT Software
- Custom Development
- Enterprise Applications
- Quality Assurance

Enterprise Resource Planning (ERP)
Integrative processes for increased efficiency

- Dynamics 365 Business Central
- Dynamics GP
- Workflow Automation

Business Intelligence
Better Decision Making Throughout the Organization

- Data Warehouseing
- Visualization Tools
- Reporting Tools
- Customized Dashboards

MAINTAINING

Managed Services
Know your systems are performing at their best.

- SQL Server Monitoring
- Dev/Ops (Outsourced Agile Developing Services)
- IoT Portal Management
- Azure & AWS Management
- Custom Monitoring Services

INDIVIDUAL SERVICES

TESTIMONIALS

"Every time we've brought Kopis onto a project, we've been pleased with the results,"

-Infor
 Senior Vice President

Without an experienced DBA, companies run in reactive mode. By staying on top of our databases, Kopis keeps Mungo Homes running in proactive mode,"

-Mungo Homes
IT DIrector

Application Security Scan

Pain   HIPAA, PCI, or other application where security is imperative.

Service   Kopis will run a penetration and security scan to identify weaknesses. Great way to prepare for an audit.

Application Security Evaluation

Pain   HIPAA, PCI, or other application where security is imperative, and need a deep dive evaluation of possible risks.

Service   Everything in App Security Scan + Code evaluation for industry standard defensive coding measures.

Business Intelligence Requirements & Design

Pain   Business needs to see better metrics to make more informed decisions, respond quicker to situations, be ahead of their competition.

Service   Kopis will work with you to understand your goals, evaluate and identify available data sources, build a plan to aggregate the data and provide a blueprint for the reporting, dashboard, and/or analytics you need to be successful.

Cloud Application Strategic Consulting

Pain   I don't want to manage hardware anymore, but I don't know the best way to move my applications to the cloud, nor do I know what is required of me to manage them once they are there.

Service   Kopis provides a migration "roadmap" and post migration support or advice.

Database Assessment

Pain   Known database issues. Generally, don't have a DBA on staff. Have a critical application dependent on one or more databases. Need to know if the database is healthy. Don't know what I don't know. I see risk because no one has reviewed it.

Service   Kopis will run scans and make alignment recommendations based on criticality of the database.

Innovation Labs

Pain   Visionary—possible emerging technologies that might be strategic importance to your product or service that are worth exploring.

Service   Short Proof of Concept / R&D spikes. Work with your team, possibly in an offsite— startup style environment. They bring the domain expertise, we bring the technical expertise. Goal is to prove that a technology is viable or not.
