

AI for Work

Search faster. Work smarter. Automate more

AI for Work reimagines enterprise productivity with AI agents that unify knowledge, automate workflows, and scale securely, helping teams cut costs, accelerate execution, and drive measurable ROI.

Capabilities

Enterprise Search

Deliver personalized, context-aware answers using Agentic RAG, APIs, and federated search that interpret intent and retrieve insights from across systems.

AI Agent Marketplace

Access a comprehensive library of pre-built, domain-specific AI agent templates that automate workflows across HR, IT, Finance, and more. Easily configurable and ready to integrate.

Custom Agent Builder

A no, low, and pro-code environment to design, configure, and deploy AI agents using prompts, business rules, and input forms.

Intelligent Orchestrator

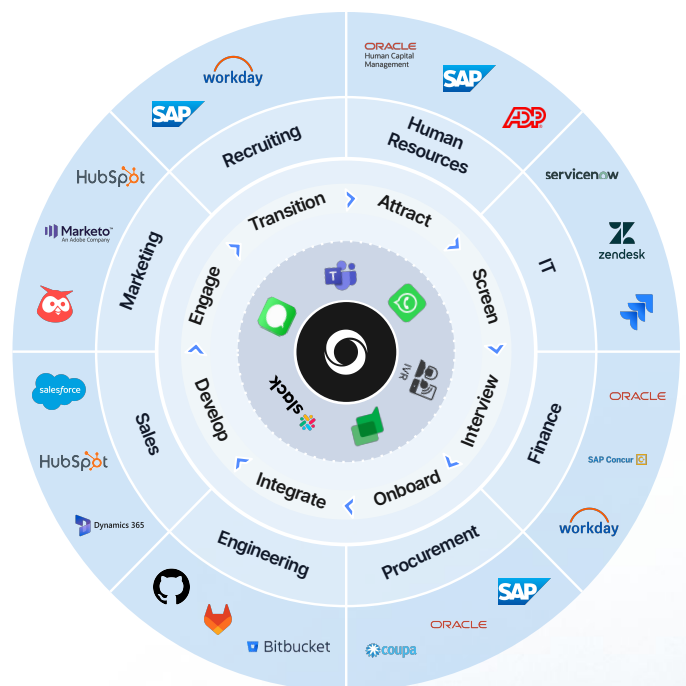

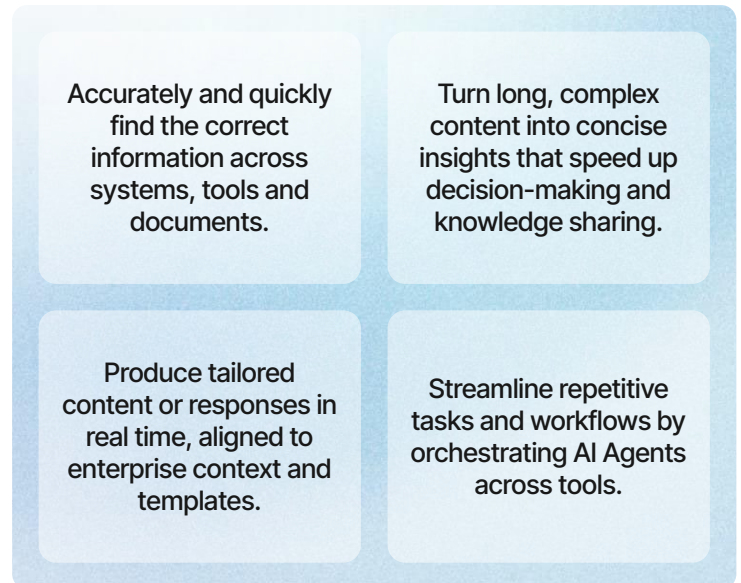

Automate multi-agent and multi-step workflows by dynamically routing tasks, selecting the right AI agents, and maintaining context throughout interactions.

Admin Controls

Manage security, access, compliance, and system behavior through centralized governance, including SSO, audit logging, and data masking.

Access Channels

Engage with AI for Work web and mobile applications, Slack, Microsoft Copilot, Microsoft Teams, and through SDK.

AI for Work

Search faster. Work smarter. Automate more

Why enterprises choose AI for Work?

Search smarter

Agentic RAG delivers accurate, cited answers and actions across 100+ systems, boosting document access from 20% to 80%.

Automate effortlessly

Trigger interoperable AI agents with a single prompt to streamline workflows and enhance employee satisfaction.

Build faster

Empower every employee to create AI agents using the no-code Agent Builder, and with 200+ agent templates and 9,000+ API actions that accelerate automation across enterprise systems.

Scale seamlessly

Leverage MCP, A2A, and extensibility on an enterprise-proven solution that delivers multi million-dollar savings and scales with your business.

Govern with confidence

Track and manage AI usage with real-time dashboards, audit logs, and compliance controls.

Customer testimonials

We took bold steps to digitize the user experience and deliver support where and how employees need it most. With Kore.ai, we were able to iterate quickly, learn from real usage, and scale AI with confidence - without sacrificing experience.

Digital Experience Team,
Global Pharmaceutical Leader

To stay ahead in this market, we need to keep disrupting ourselves and rethinking how we work. Partnering with Kore.ai helps us scale smarter - automating secure, compliant workflows while giving our advisors the tools to deliver more personalized, trusted financial guidance.

Head of AI
Leading Global Financial Services Company

As a global leader in AI, we saw a clear opportunity to bring that leadership into our own workplace. Our work with Kore.ai shows what's possible when you use AI not to replace people, but to enhance how they work, connect, and lead.
