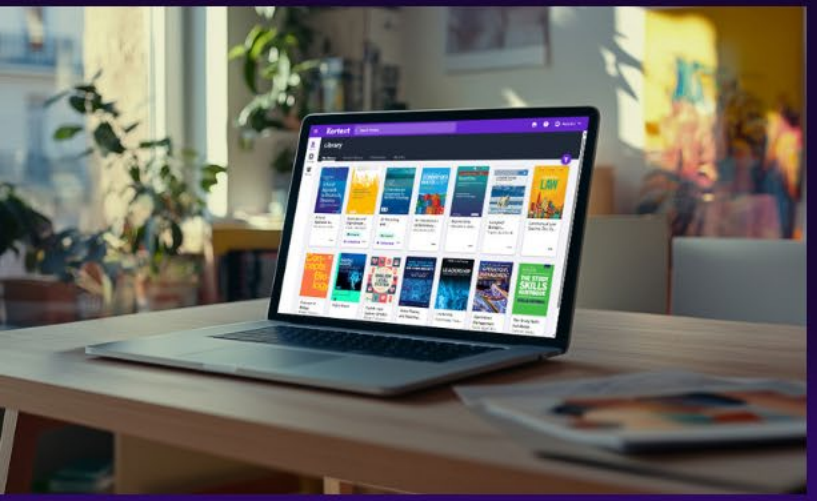
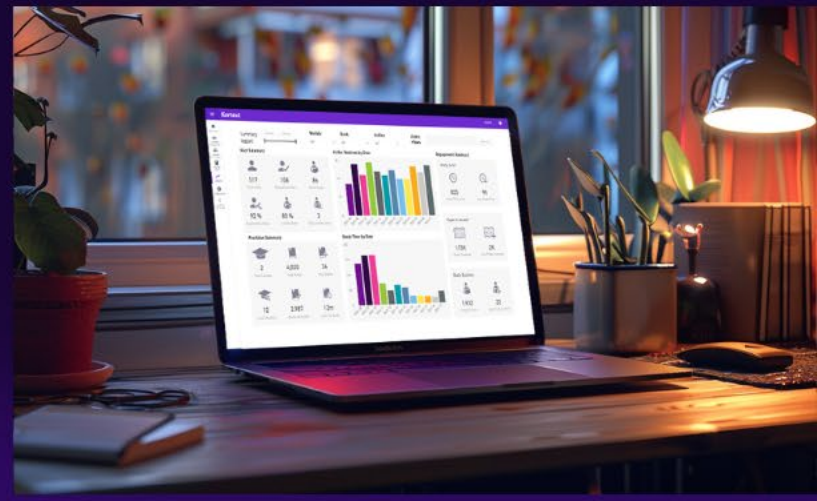
Introducing Kortext fusion

One platform – a unified solution

Kortext Est 2013

Kortext fusion – the very foundation of what we do





Kortext fusion unlocks the power of AI with a single, strategic foundation that connects all our innovative products to accelerate your institution's digital transformation.

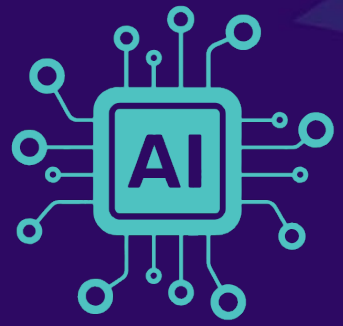
Together, our products deliver a seamless, VLE-connected, AI-powered, personalised study application for every student. This is married with content, engagement tools and predictive learner analytics that support better student outcomes and deliver invaluable insights.

Kortext Est 2013

Kortext fusion – the best interconnected digital learning experience

University knowledge estate

Required course content including eTextbooks, journal articles and PowerPoints.



AI-powered teaching & learning

Access to AI tools, peer-to-peer collaboration and formative assessment, all connected via the VLE.

Data, analytics & student outcomes

Leadership insights, predictive analytics and automated reporting, to support both internal and external metrics.

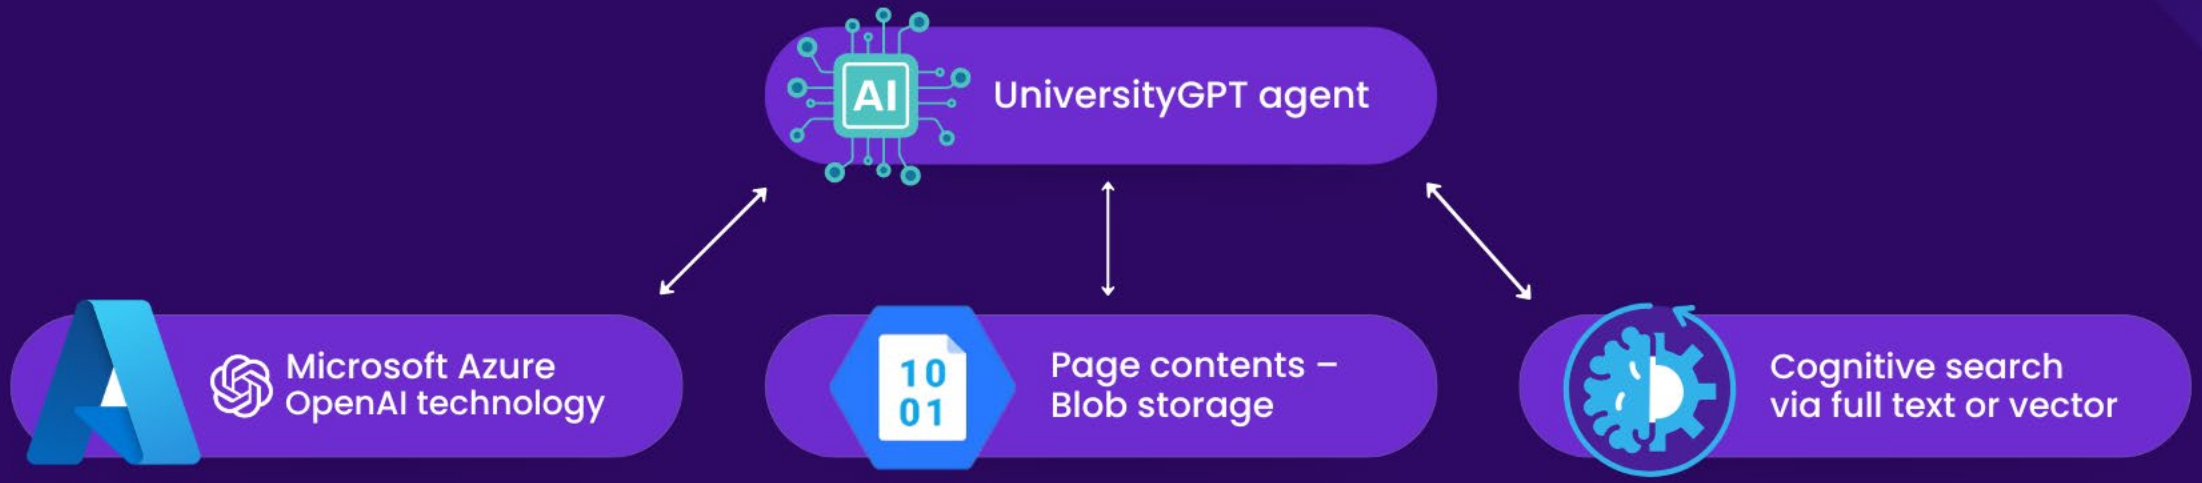
UniversityGPT – featuring a unique agent construct



UniversityGPT's agent construct allows it to respond accurately to a range of prompts.

It can pull from the university knowledge estate and Blob storage – directly linking to books available within Kortext study - as well as using Azure OpenAI technology to mirror a typical GPT interface. Cognitive search allows users to interact with UniversityGPT for a range of reasons – such as translating its responses into different languages.

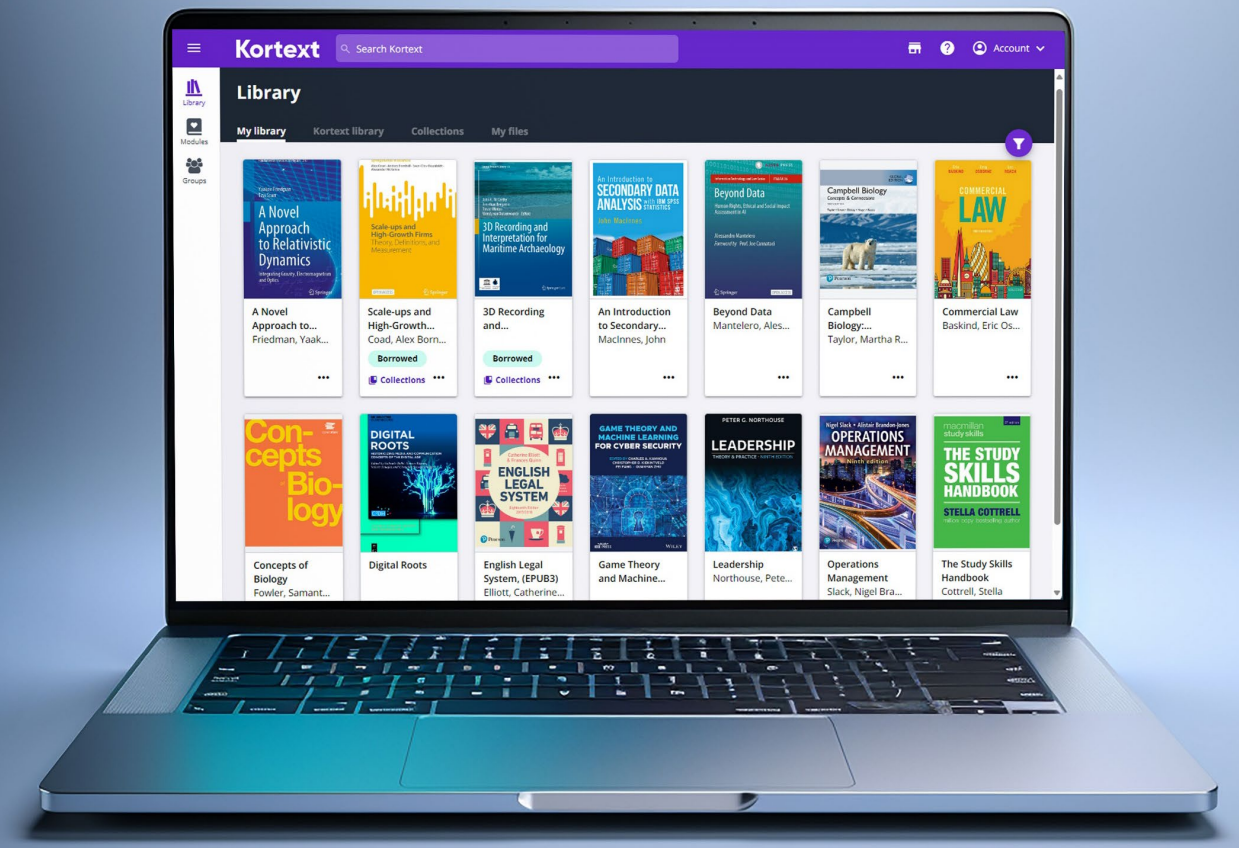
Kortext Est 2013

Our largest-ever content library

Via our smart study space, Kortext fusion serves as a gateway to our biggest-ever content repository, currently containing:

- Over three million eBooks
- More than 1.9 million educational videos
- Over 20,000 OER & OA materials

These have been aggregated from 8,000+ global publishers, including Wiley, McGraw Hill, OUP, Springer and De Gruyter.



Seamless VLE integration

Kortext fusion and our smart study space both easily lock into your university tech systems, however they are configured.

We offer enhanced integration and operability with your learning ecosystem, while providing students with streamlined access to the content they need.

The Kortext fusion platform can also be configured with and integrate to Microsoft Teams.
