Textbookweb

Providing the right tools to achieve the right outcome

A cutting-edge digital platform supporting higher education institutions in enhancing student engagement and achieving learning outcomes

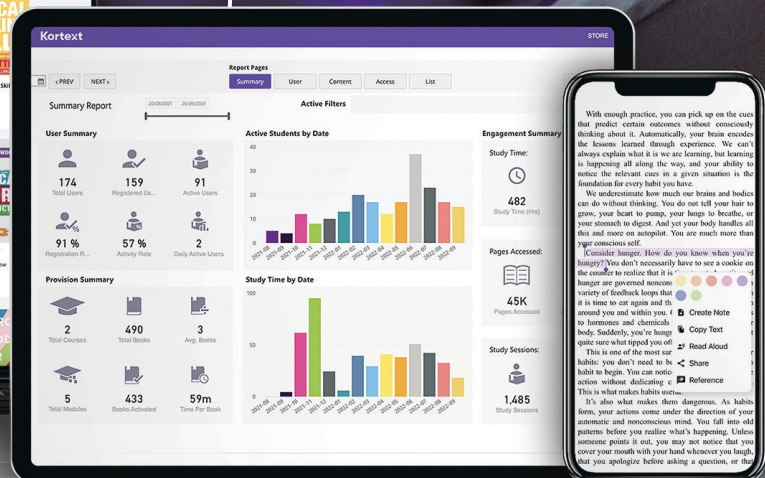

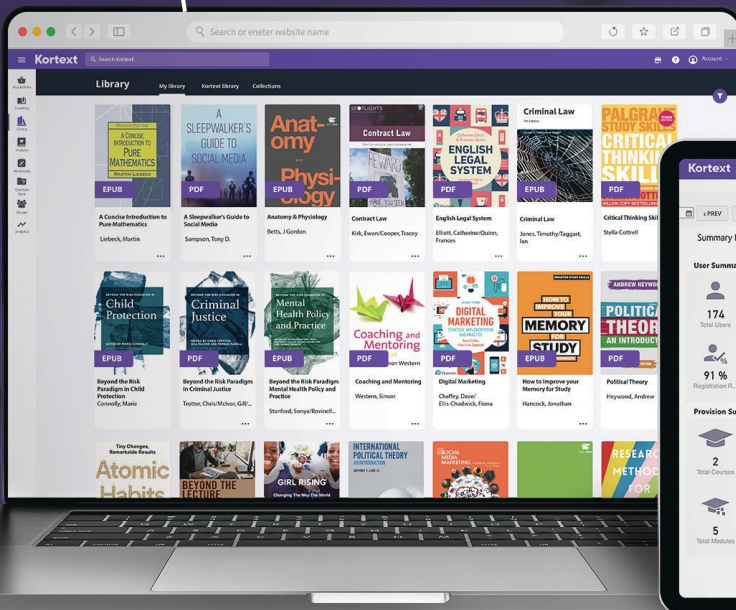

Ground-breaking AI study tools

Kortext Premium, our newest innovation, includes powerful AI study tools. Working exclusively with your provisioned content, Kortext Premium's tools allow you to introduce trusted generative AI to your institution with peace of mind.

Powerful, detailed analytics

Our Arcturus platform will grant your institution access to incredibly detailed data, reinventing how you analyse content usage and allowing you to manage your reading lists more effectively than ever before.

Faster access to reading lists

Arcturus enhances student productivity. It combines seamless VLE integration, collaboration and optimised workflows with quick retrieval of course materials on any device, anywhere, anytime.

Personalised study experience

The platform offers the student a fully personalised study experience. From the books provisioned on the digital bookshelf, to the reading preference options within our interactive eReader, to the upload of student's own digital content, everything can be unique.

Our largest ever content library

Our ever-growing, five million strong multimedia content library is comprised of eBooks, course-specific videos and over 13,000 open educational resources.

Driving student success through data and precision insight

STREAM
BY SOLUTIONPATH

The StREAM Student Engagement Analytics Platform provides educators with near real time insight into how students are engaging in their academic activities at cohort, course and individual level in a single platform.

How StREAM works...

- StREAM takes real-time data from a wide range of digital touch points which represent a student's participation in their academic learning (e.g. VLE, Library, Kortext learning resource data, lecture capture, SIS).
- The StREAM engagement algorithm transforms this data into a daily measure of engagement by distributing learners into none to high engagement categories.
- Engagement dashboards allow both students and their educators to visualise engagement for self-reflection, and alerts and intervention tools help to activate proactive and meaningful outreach that support retention, attainment and well-being initiatives.

Leading global universities trust Kortext

Thousands of institutions in over 100 countries partner with Kortext to deliver digital learning materials directly to their students.

The University of Manchester

Providing student engagement analytics for our academic staff, together with other information, is vital for them for early intervention in terms of non-continuation risk.

MANCHESTER
1824

The University of Manchester

Middlesex University

In terms of how we work with Kortext, it has always felt to me to be a successful partnership. Our NSS has gone up about 20% in the period of time we've been running this, so satisfaction with our resource provision has risen.

Partner with Kortext and join 5000+ institutions worldwide in transforming student outcomes and well-being.
