

MICROSOFT FABRIC MIGRATION ASSESSMENT

MICROSOFT FABRIC COMPONENTS AT GLANCE

- + DATA FACTORY
- + ONE LAKEHOUSE
- + SYNAPSE
- + POWER BI

Microsoft Fabric Migration Assessment by KPI Partners is a 2-day assessment that allows organizations to evaluate their current data architecture and understand how Microsoft Fabric's modern data platform can help deliver unified experience for organizations

Companies today rely on Data to make informed business decisions. Hence it is essential to have a unified data environment that delivers an end to end analytics solution.

This assessment helps customers understand the gaps in their current data architecture and how Microsoft Fabric's lake centric solution can centralize all the business data within a unified, governed hub and enable real time insights to deliver business value.

DELIVERABLES

-  Understanding existing Data management and analytics systems
-  Understand the customer's business objectives and challenges with current state of systems.
-  Evaluate org readiness for Microsoft Fabric migration and align business objectives with Fabric's lake-centric solutions
-  Design a high level Fabric based data architecture

AGENDA

-  **Day 1** - Kick-off meeting to understand business objectives, limitations of current systems and success criteria for customers. Review scope of Assessment and introduce Microsoft Fabric components.
-  **Day 2** - Review current data engineering & BI architecture. Discuss Assessment outcomes and share high-level Fabric based architecture.
