BI Modernization with Power BI

From Discovery to Implementation

Turn your business intelligence modernization into reality with KPI's proven methodology and accelerators. Our experts guide you every step of the way — from readiness assessment to full-scale implementation — ensuring a smooth, validated, and value-driven transition to **Microsoft Azure, Fabric, and Power BI**.

- 1

Discovery & Assessment

Our team evaluates existing BI workloads and dependencies, and assesses modernization readiness to build a clear, actionable roadmap.

- 2

Proof of Concept (POC)

We execute a focused pilot migration of select reports & dashboards to validate the approach, demonstrate value, and confirm alignment with your objectives.

- 3

Full-Scale Migration

Following the validated plan, we complete the enterprise-wide migration — modernizing data sets, reports, and dashboards for optimal performance and value.
- 4

Validate & Operationalize

We validate data, optimize performance, and ensure visual integrity. Review and roadmap sessions provide a blueprint for future modernization.

Move From Any BI Platform To Azure

Migrating and maintaining your enterprise BI platforms doesn't need to be complicated. KPI DataBridge Suite supports virtually any source-to-Azure combination.
