Healthcare is facing significant global challenges, including aging populations, escalating healthcare costs, workforce shortages, and widening health inequalities. **These challenges highlight the urgent need for transformation.**

Furthermore, healthcare organizations are challenged by fragmented health systems, outdated processes, siloed data, and insufficient integration among care providers, leading to inefficient operating, rising costs, and poor governance.

KPMG (LLP) and Microsoft are helping healthcare providers solve some of their most complex healthcare challenges by enabling them to embark on a Digital Health Transformation.

Leveraging our established track record, aligned capabilities, and deep specialist knowledge, we are delivering Digital Health solutions to help healthcare providers around the world unlock new levels of value across every aspect of the healthcare ecosystem. Our transformative approach allows Health Providers to modernize front, middle, and back-office functions and build integrated care models using the power of Cloud, Data and AI to help deliver greater efficiencies, improve healthcare systems, and enhance outcomes for patients, front-line workers, and clinicians.

Together, we are redefining the future of healthcare

KPMG and Microsoft are uniting years of health transformation experience with leading industry solutions to help redefine and transform healthcare.

By combining our healthcare, transformation, and governance knowledge, proprietary accelerators, and established methodologies with Microsoft's leading technologies — such as Microsoft Azure, Microsoft Fabric, Microsoft Dragon Copilot and Microsoft Copilot — we harness the power of Cloud, Data and AI to help deliver standard data models and healthcare delivery models — enabling healthcare providers to drive sustainable change.
