Launching the next-gen employee engagement platform

The Challenge

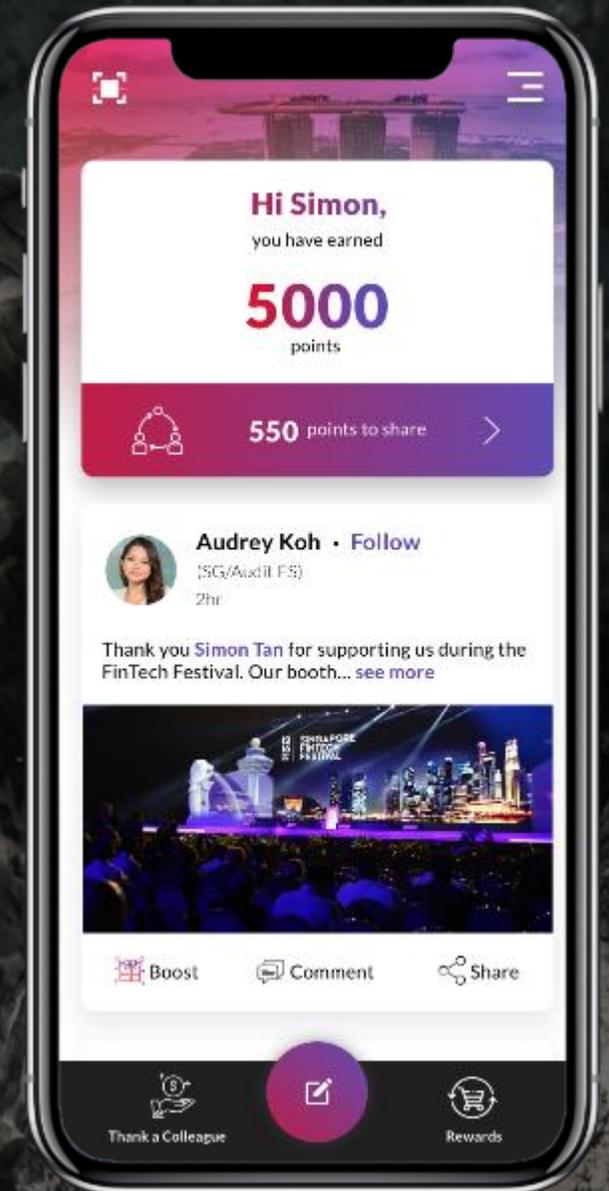

KPMG Singapore understood that it needs to connect differently with the emerging mind-set shift of its workforce to boost the engagement level and retention rate. KPMG looks at this initiative as a platform to connect with its employees by creating memorable experiences and growth opportunities on personal and professional level while they progress through their career.

What We Did

- Understood pain points and needs of employees through design thinking
- Extracted key insights and conducted ideation workshops to develop differentiated value propositions for employees' personal & professional needs
- Developed a user-centric and ready-to-deploy solution, which allows:
 - employees to receive reward points for executing certain tasks
 - employees to reward each other on-the-go (peer-to-peer)
 - employees to use earned points for direct payment (via QR code) or purchasing pre-listed vouchers (reward program)
 - employees to share and capture stories on social wall
 - HR to get full visibility on highly engaged employees and top performers
