TSAT

Threatcop Security Awareness Training

Phishing Simulation & Employee Security Awareness Training Platform

TSAT is a solution engineered to assess employees through sophisticated phishing simulations that prevent Email Phishing, QR Code Phishing, Attachment, Smishing, Vishing, WhatsApp Phishing, and Ransomware. TSAT addresses the "Assess" stage of the AAPE framework associated with People Security Management, hence mitigating social engineering attacks.

- *AI-Based Template Generation*
- *Multiple Attack Vectors*
- *Breach Time and Average Phish Risk rate*
- *Spear Phishing using Fake CC*
- *Location based Employee Risk*
- *Summary Reports for Executives*
- *Tailored Templates and Landing Pages*
- *Multi Language Support for Dashboard*
- *Employee Vulnerability Score*

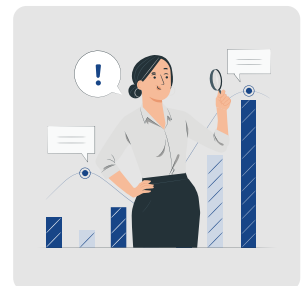

Assess Your People with TSAT in 3 Easy Steps

Simulate Phishing campaigns using any Attack Vector

Real-time tracking of hacked users

Tracks User Progress Continuously

Threatcop Security Awareness Training Features
