

Risk-Proof UCC Management. Future-Proof UCC Investment.

Re-unify now – with Kurmi.

UCC has never been more complex – or less "unified." Multi-vendor platforms are the norm. Migration from legacy to new and hybrid environments is in the mix. And now "working from wherever" creates all new uncertainty. Your business partners are relying on you to support their people and manage these changes every day.

Kurmi simplifies your world **with award-winning, automated UCC management solutions** that streamline administration from end point to end user, fundamentally "reunifying" UCC.

Organizations from banks to hospitals to universities and manufacturers rely on Kurmi to eliminate manual and fragmented administration, **providing transparency with control.** Managed Service Providers **trust** Kurmi to support *millions* of users in multitenant, multi-vendor environments, **improving quality of experience.**

No matter how many users, where they move and what road you're on, **Kurmi saves time, lowers costs (by up to 80%!) and delivers secure performance** to enterprises and MSPs alike.

Simplify

Day-to-day management

Automate

MACDs to save time & money

Delegate
