Calls using StarTeams

You can call any employee by StarTeams combining Teams and Kyivstar's fixed telephony, which has the function Virtual PBX

Thanks to this, you can simultaneously use such services:

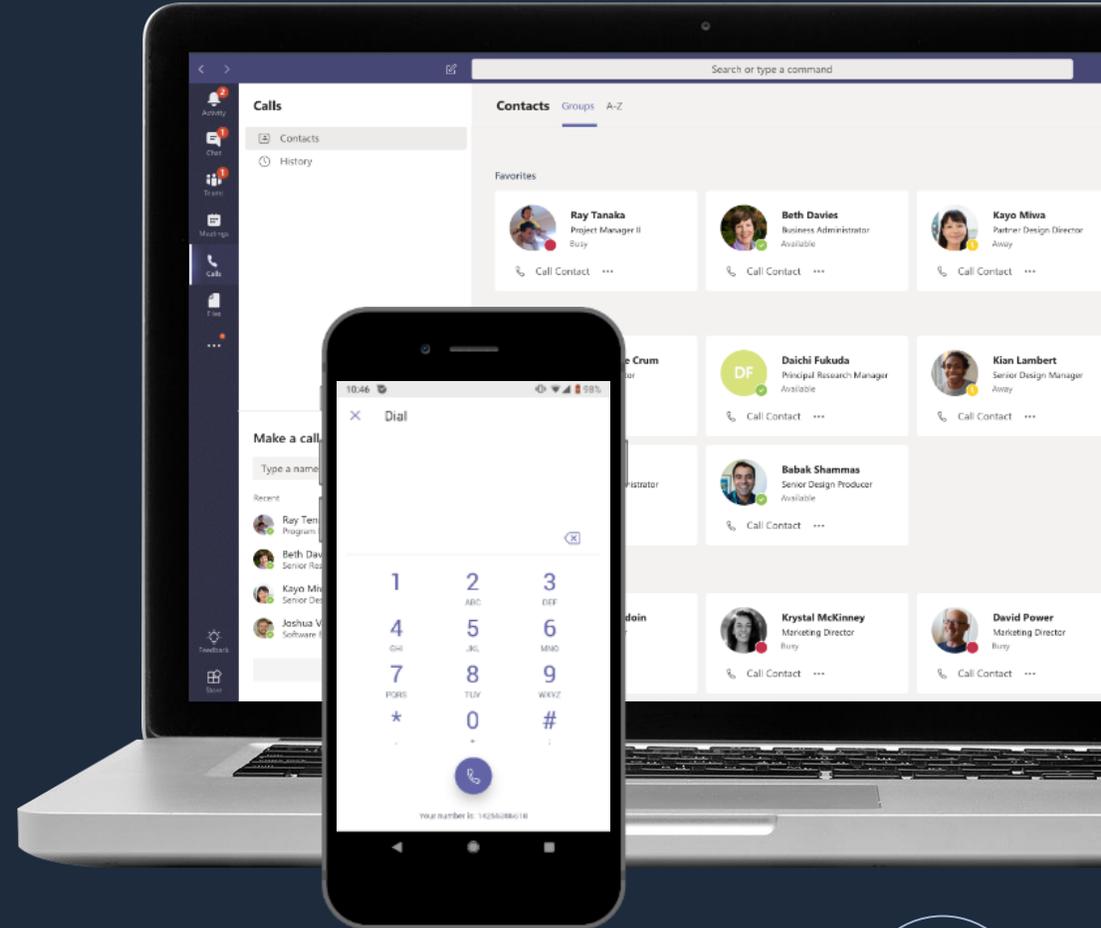

Office 365

Fixed telephony

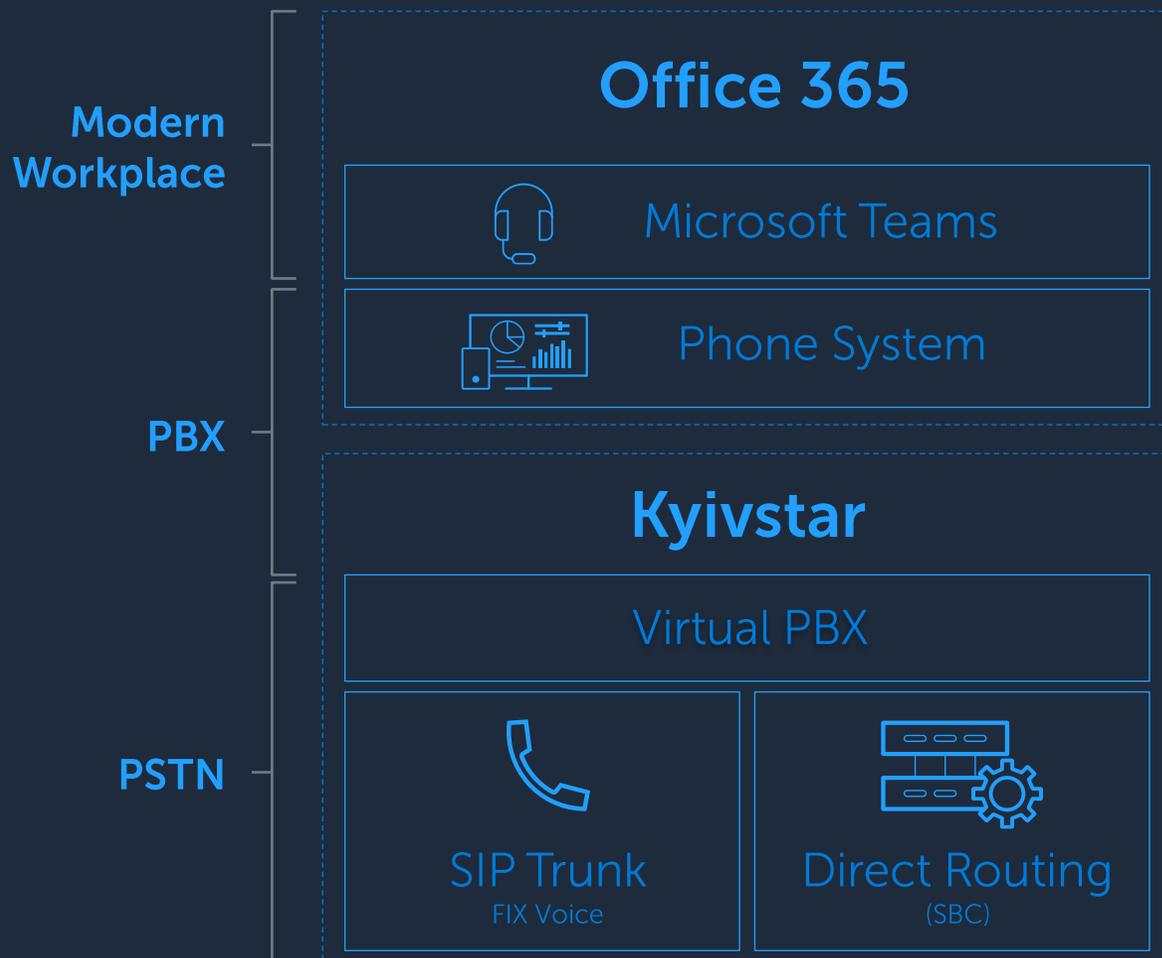

Virtual PBX of Kyivstar

StarTeams

StarTeams is a service created by using Direct Routing technology. StarTeams customers can use Kyivstar's fixed (landline) numbers in Microsoft Teams application, manage call routing by Virtual PBX of Kyivstar.

StarTeams includes:

- Office 365 subscriptions
- Fixed telephony (SIP Trunk)
- Virtual PBX of Kyivstar (vPBX)

StarTeams

Easy. You are always in touch, and the programs you need for work can be opened on any device.

Reliably. Work remotely, because the data of your company, partners and customers is safe.

Efficiently. With cloud services, manage business processes anywhere, anytime.

Simply. Kyivstar has set up all the necessary programs for you and signed contracts with service providers.

Profitably. Pay only for the services you use. You do not need to buy additional equipment and pay for its settings or support.

Individually. Personal service from Kyivstar and technical support from Microsoft.

How can Virtual PBX help business?

Increase sales

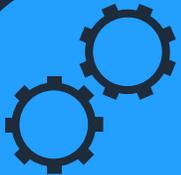

Efficiency of internal processes

Flexibility and scalability

Reduce communication costs

Continuity and reliability of business process

Security

Virtual PBX

Multi-channel number with linear, cyclic and group distribution of calls

IVR and online service management

Call recording and online call statistics

Consolidation of numbers into a network with short numbering. Parallel call.

Restriction of outgoing and incoming communication

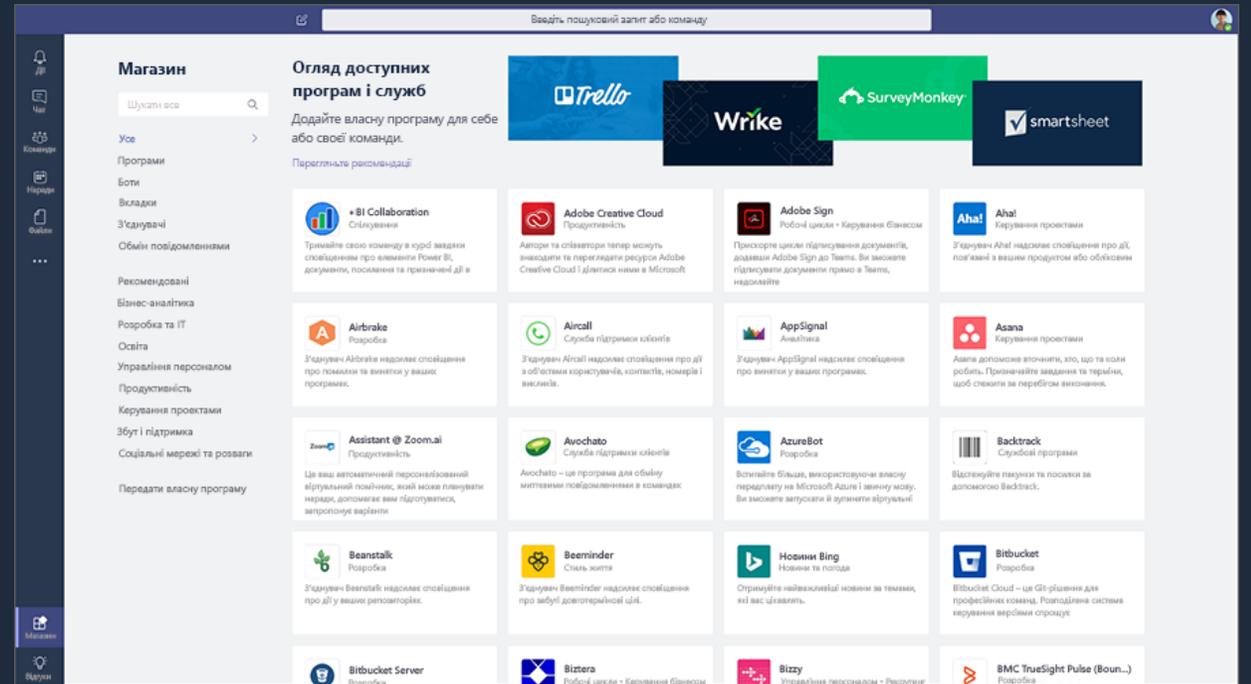

Cost and principles of charging

| | "Convergent" | "Cost control" | "Short number" |
|---|--------------|----------------|----------------|
| Subscription fee, UAH / month | 36 | 24 | 0 |
| Call recording, UAH / month | 240 | ✗ | ✗ |
| "Secretary", interactive voice menu, UAH / month | 120 | 120 | 120 |
| «API», integration «Virtual mobile PBX» with CRM-systems Bitrix24 and StarBox | | | |
| One-time service connection fee "API" (does not depend on the number of mobile and / or fixed numbers), UAH | 1200 | ✗ | ✗ |
| Subscription fee for each fixed and / or mobile number to which the service is connected "API", UAH / month | 120 | ✗ | ✗ |

Integration with various platforms and applications

Teams has everything you need for teamwork. You can integrate the programs and services you need, for example Excel with Office 365 and products of other vendors, in particular Trello, Planner and Zoom

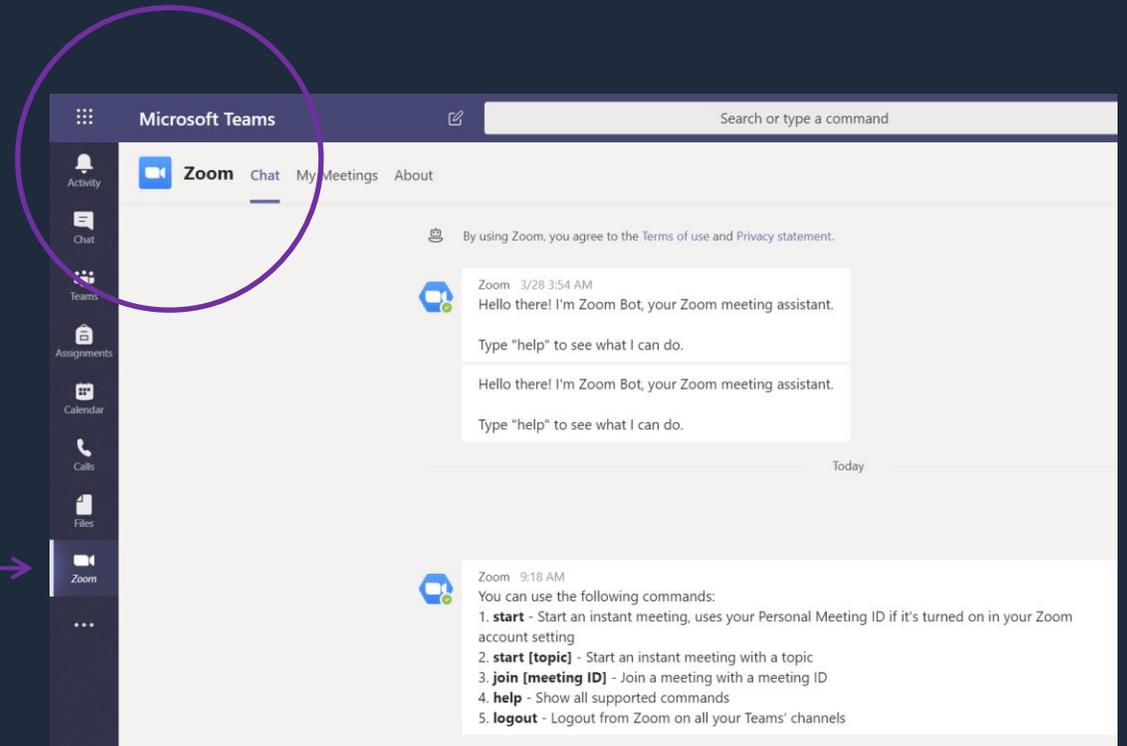

Integration of Zoom functionality in Microsoft Teams

Users of Microsoft Teams and Zoom rooms can join each other's meetings from their meeting rooms.

By pressing just one button, you can establish a direct guest connection, and then you can save high-quality audio and video.

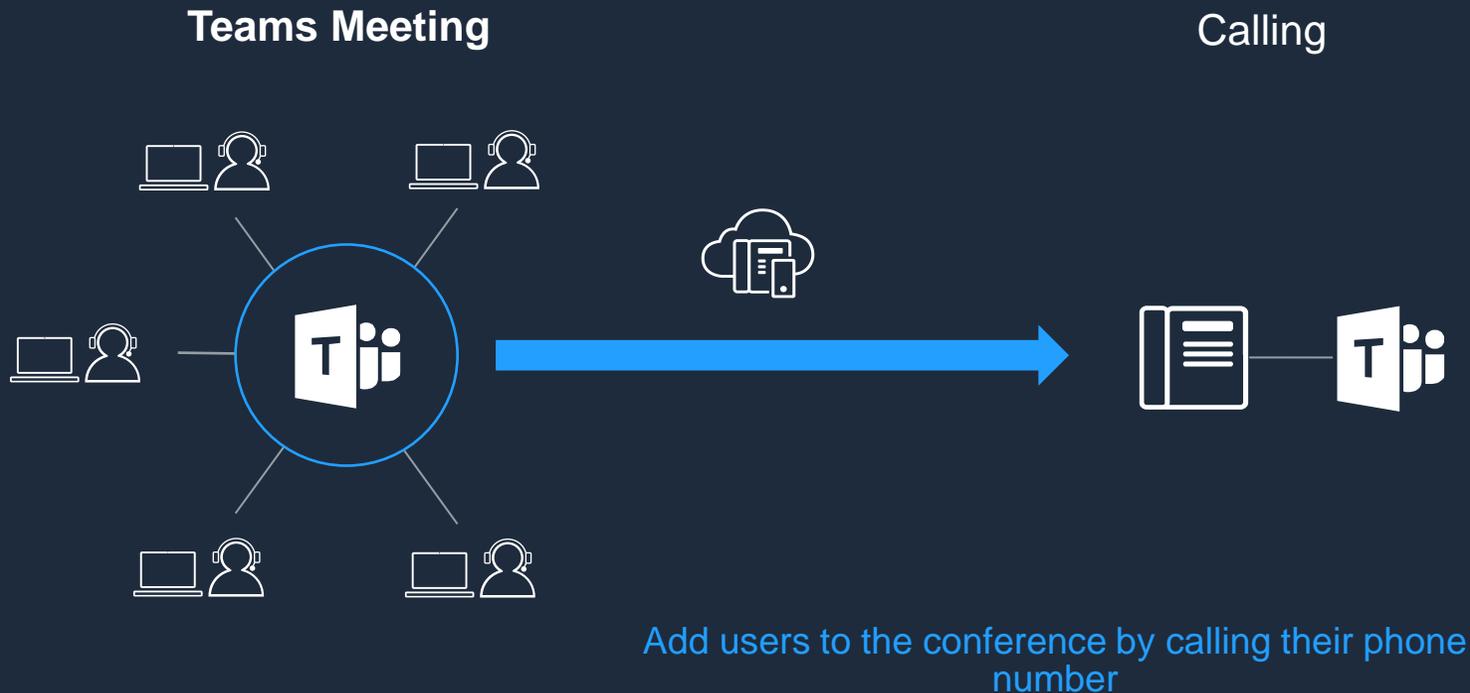

Users receive all the necessary functions for meetings directly from their meeting rooms.

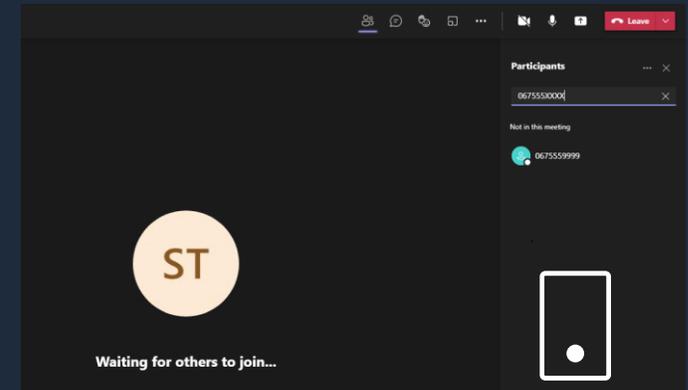

Call the subscriber to join him to the conference

Add users to the conference by calling their phone number

Calling

Any number

This is required by various departments and industries

Marketing

Launch marketing campaigns and market entry activities that are useful to different groups of internal and external stakeholders

Selling

Creating and submitting proposals with the participation of various stakeholders. Management of sales planning, training and preparation for sales with a single solution.
