Data & AI Discovery Workshop for Azure

Kyndryl Apps, Data & AI

This workshop helps develop and improve clients' data architecture leveraging Azure technologies. Over the course of 4 or 8 weeks, Kyndryl provides in-depth analyses and concrete deliverables to advise on the implementation of data & AI use cases, addressing data modernization and cloud migration strategies. This is a collaborative experience to solve the complex business problems of today's world.

The Kyndryl advantage

Leverage decades of experience from our worldwide team of highly skilled consultants, architecture blueprints and prebuilt solution accelerators to maximize return on investment.

What we offer

The Kyndryl Data and AI Discovery workshop is for companies of all sizes that want to improve their data strategy to gain productivity, better understand their customers and their business, and scale data & AI use cases.

Kyndryl provides an experienced team of architects, engineers, data scientists, and analysts, with a proven track record. We will help design and transform your data platforms to implement an enterprise-grade data fabric architecture for Microsoft Azure.

Workshop Value

- Analyzes current data estate and architecture

- Creates a data and AI strategy aligned to end-customer needs and overall businsess goals.

- Provides an architecture and implementation roadmap

- Delivers use cases and blueprints that enable actionable business and customer insights

Why Kyndryl?

kyndryl.

- Kyndryl has decades of experience working with customers to deliver enterprise-grade workload analysis, migration, implementation and managed services for the most complex workloads

- Kyndryl has the people, processes, and technology to help organizations progress their digital transformation journey using intelligent data and AI-driven insight
