

Data Estate Modernization with Azure

Customer challenges

Businesses are struggling to merge different data sources affordably, improve analysis flexibility, gain meaningful knowledge from technology investments and reduce security threats. With the growth in data, companies face more problems with managing data on a large scale and ensuring strong governance. Kyndryl can help such organizations achieve desired business outcomes by providing advisory, modernization and managed services.

Solution highlights

Kyndryl's data estate modernization services can help transform and modernize your legacy systems with a solid data foundation and platform to enable reliable, modular and scalable data and AI solutions that power your business forward.

Our comprehensive services on Microsoft Fabric encompass the following key areas to enhance your data management and analytics capabilities:

- Microsoft Fabric readiness assessment and roadmap
- Design and build new data services on Fabric
- Migrate existing data, data models and data services from legacy systems to Fabric
- Implement data pipelines to centralize data to Fabric and develop insights
- Build and publish dashboards, create and train AI models
- Implement data governance for ongoing data management

Customer benefits

Kyndryl's Data Platform Managed Services help organizations maintain their data lakes and data warehouses and reduce overhead to manage complex data platforms, and ensure cost-efficiency, reliability, security and sustainability.

1. Establish a better foundation for analytics to enhance customer experiences and operational efficiencies
2. Simplify data governance and compliance management
3. Scale advanced analytics, machine learning and AI for faster, more effective innovation and operations
4. Reduce data management costs through Kyndryl's flexible and modular services
