

Kyndryl Data Governance

In today's rapidly evolving digital landscape, protecting your data, reinforcing its ethical use, and maintaining privacy is no longer optional—it is essential. Data governance and management is central to data privacy, security, and realizing the full potential of artificial intelligence (AI) at scale.

Data has become the lifeblood of every business. But to fuel innovation and growth, data must be readily discoverable, understandable, governable, and safe. Organizations are increasingly engaging with professional security services to proactively address regulatory and compliance requirements for data security.

Highlights

Kyndryl Data Governance Implementation and Managed Services leverages market-proven frameworks and Microsoft Purview best practices to help organizations with end-to-end data governance. This includes:

- Data discovery and classification mapping
- Metadata management and lineage
- Create a unified map of all your data
- Make data easily discoverable and maximize its value
- Create policies to access, move, and share data
- Limit the growth of real-time data by eliminating duplicates
- Locate and manage sensitive information, even within unstructured data
- Deploy DLP policies to restrict data leakage
- Utilize data connectors to bring in data from external sources

Kyndryl's Point of view

Kyndryl, a leader in cyber resilience, works with customers to anticipate, protect, withstand, and recover from cyber incidents. Kyndryl's Data Governance Services program, which specializes in data protection and data governance, mitigates risks arising from lack of control over data and indistinct data governance.

With Kyndryl Data Governance Services we partner with our customers to design, implement, and manage solutions that best meet their needs. We provide guidance and support to:

- Safeguard sensitive information and mitigate risks
- Be regulatory-ready while fostering trust with customers and stakeholders
- Leverage cutting-edge solutions, industry-leading methodologies, and a deep understanding of emerging threats
- Unlock the full potential of your data while keeping it secure, transparent, and ethically managed

Kyndryl Data Security, Responsible AI & Privacy

Data Governance Services Overview

Kyndryl provides end-to-end services that enhance data maturity from design through implementation to governance. Our services include data discovery, classification, management, policy development, risk evaluation, compliance, AI integration, tokenization, and lifecycle management to safeguard data assets and unlock their full business value. This means that our customers can better contain costs and do more with less.

Kyndryl offers two Data Governance Services:

Implementation Services to design, deploy, and test a data governance process that supports the customer's business goals, and **Managed Services** to monitor, review, and refine data governance processes to augment decision-making.

Kyndryl Data Governance provides the foundation for effective data discovery, governance, and usage. It captures metadata across analytics, software-as-a-service (SaaS), and operation systems in hybrid, on-premises, and multicloud environments.

Automated access policies make it easier for everyone in your organization to access the data they need, while still ensuring it stays protected.

- Kyndryl Data Governance Data Sharing enable customers to share their data in-place—without moving or copying it—in near real time, within and across organizations.
- Kyndryl Data Governance Information Protection helps our customers automatically discover and protect sensitive data anywhere it lives, so they can more effectively manage it and reduce overall risk.
- Kyndryl Data Governance Data Loss Prevention helps users understand and take the right actions while using sensitive data, helping balance security and productivity.
- Kyndryl Data Governance data connectors lets customers ingest data from a wide variety of sources with high fidelity. Once ingested, data can then be used across multiple solutions.
- Kyndryl Data Governance Data Lifecycle Management automates classification and governance at scale, using file properties, pattern recognition, 90+ sensitive info types, and machine learning.

Kyndryl's Competitive Differentiators

- Proven expertise in consulting, implementation and run (managed) support to enable efficient customer operations.
- Platform agnostic services, working with major vendors to help customers modernize and deliver operational excellence.
- Kyndryl has the capability to provide
- end-to-end services from assessment, advice, transformation, and modernization to implementation, management, and operation for the customers.
- Decades of experience managing mission critical IT data and infrastructure for our customers
- Vast pool of skilled resources with unparalleled cybersecurity risk management, security technology management, data security, and privacy & AI expertise.
- Experience serving customers in complex, highly regulated industries
- Kyndryl taps the collective expertise of more than 7,500+ dedicated cybersecurity and resiliency experts to help you reach your key goals.
- We empower thousands of enterprise customers, including 60% of the Fortune Global 100 and more than half of the Fortune Global 500.
- Kyndryl has a global presence in over 60 countries.

About Kyndryl

Kyndryl is the world's largest technology service provider, serving thousands of enterprise customers in more than 60 countries. The company designs, builds, manages, and modernizes the complex. Mission-critical information systems that the world depends on every day. For more information, visit www.kyndryl.com.
