

Mainframe Modernization | Kyndryl + Microsoft

Unlock the power of your mainframe data and applications by securely connecting it to the rest of your business with our **Mainframe Modernization solution**. Take advantage of a powerful, previously untapped data source for application modernization and near-real-time analytics use cases. Plus, develop innovative, streamlined apps with the **Microsoft Power Platform**.

Mainframes have long-term viability and are an important element of a **modern, hybrid strategy**.

of executives say mainframes have long-term viability¹

Microsoft Power Platform provides

140% ROI

over three years²

Kyndryl:

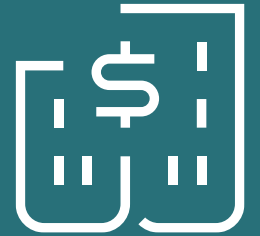

22,000

Holds more than 22,000 certifications, with deep expertise in integrating mainframe data with Microsoft Power Platform and Azure Data & AI Services

Serves

75%

of the **Fortune 100**

Enterprises in the U.S. and Brazil stepped up their modernization of mainframe applications and increased outsourcing of related capabilities last year, according to the Information Services Group Provider Lens report.

“Companies are moving away from traditional mainframe infrastructure because the benefits of doing so are simply too great. All forms of modernization can simplify and improve operations while reducing costs.”³
